### Objectives of hands on training workshop

i) To make the students more technically sound along with the theoretical knowledge.

ii) To teach students about requirements of company or industry, to train them, help to improve their soft skills.

iii) This training workshop will boost productivity because the trainee is working while learning, and it boosts the participants confidence because they have a trainer available to ask questions of if they are unclear about something.

iv) Students who undertake a part of their course in a practical and hands-on way are a lot more likely to graduate with a better understanding of how the industry works and have a better feel for the processes involved in their chosen career. They will enter the workplace with a much higher level of understanding of what is required of them.

v) It will definitely improve career opportunities to students.
