Gg. 234 (SEC 1): Regional Planning And Development	 Student will become well aware about the Regional Planning and Development. Students will get the knowledge of planning, its limitation Students will be able to participate in planning and regional development Students will get knowledge about various approaches and models of regional planning and development. Students will be aware of the Special area development plans and Agro Ecological Zones of Maharashtra

Gg. 233 (DSE 2 A): Practical	1) To give basic information about various tools and techniques used
Geography (Scale and Map	in making maps.
Projections)	2) To understand the concept of scale at the initial stage
	3) To know how to draw the maps on various scale
	4) To acquaint the students with basic of Scale, Map Projections and cartographic Techniques
	5) To enable the students to use Scale Map Projections and cartographic techniques

Semester-IV

DSC-D (Gg. 241): Human Geography	To acquaint the knowledge about understanding of Human Races in the World.
Gg. 242 (DSE 1 B): Geography Of India	 To make the students able to understand Geographical Personality of India. To study minerals and power resources in the specific regions of India. To study the nature of industries and their development in India. To aware the students about agricultural and demographic problems and make them able to find.
Gg. 244 (SEC 2): Remote Sensing And Gps Based Project Report	 To understand the principles of Remote Sensing. To acquaint the students with fundamental concepts of Aerial Photography. To introduce students with advance techniques for data collection. To learn principles and applications of GPS. To learn basics of GPS based survey.
Gg. 243 (DSE 2 B): Practical Geography (Surveying)	 To acquire knowledge of survey language and sense of technique of surveying. To know the scale and distance of surveying. To know how to draw layout by surveying of region. To acquaint the students with basic knowledge and technique of ground survey. To acquire the knowledge of survey instruments. To provide basic information about mechanism of survey instruments. To acquaint the knowledge how to use survey instruments. To know the importance of surveying and survey instruments.

Semester-V

Gg. 351 (DSC 1E)	1) To create the environmental awareness amongst the students.
Environmental Geography	2) 2. To acquaint the students with fundamental concepts of Environmental Geography.
	3) 3. To aware the students about the processes and patterns in the natural environment.
	4) 4. To acquaint the students with potentials of Environmental Geography.
	 5) 5. To aware the students about use of resources with prudence. 6) 6. To acquaint the students with different environmental policies.
Gg. 352 (DSE 3A) Economic Geography	1) To acquaint the students with the knowledge of economic realm in the world.
	2) To highlight the different economic activities.3) To study mineral and power resources in the specific regions of the world.
C= 252 (DCE 4A) Date 42 = 12 =	
Gg. 353 (DSE 4A) Practical in Human Geography and Geo-	 To introduce the practical approach of Human Geography. To introduce the importance of statistical techniques in Human
Statistics.	Geography.
	3) To introduce some basic research methods to the students.
Gg. 354(SEC 3) Field	1) To introduce the analytical skill of field-work.
Techniques and Introduction to Project Report.	2) To develop the skill of selection of appropriate technique for field study.
	3) To enable the student to frame different types of questionnaires to conduct a field study.
	4) 4) To develop the analytical interpretation and report writing based upon the data collected during a field study.
Gg. 355 (GE 1A) Disaster Risk	1) To introduce the concept of disaster risk.
Reduction.	2) To introduce the concept of disaster risk.2) To prepare DRM Plans and its implementation.
Acquellon.	3) To aware the students about the Disaster Risk
	Reduction/Mitigation strategies.

Semester-VI

Gg. 361 (DSC 1F) Population	1) Understand the components of population change.
Geography.	2) Develop skills to use population information in the planning
	process.
	3) Understand the impact of planning activities on population size, composition, and distribution
	4) Population is an important resource. The development of any
	nation is depends on human resource. It is a prime deity to acquaint
	with the human resource of the nation.
	5) To understand the recent problems of population in the world as
	well as nation.

Gg.362 (DSE 3B) Political Geography	 To enable students to acquire knowledge of Political Geography. To understand basic concepts of Political Geography. To study various theories of Political Geography. To understand the frontiers and Boundaries.
Gg. 363 (DSE 4B) Practical in Physical Geography	 To introduce the students with SOI toposheets and to acquire the knowledge of toposheet Reading / interpretation. To acquaint the students with IMD weather maps and to gain the knowledge of weather map reading/ interpretation.
Gg. 364 (SEC 4) Geographical Information System.	 To introduce the fundamentals and components of Geographic Information System · To provide details of spatial data structures and input, management and output processes. To aware about the application of GIS in various fields.
Gg. 365 (GE 1B): Sustainability And Development	 It brings to attention the Students about the issues which surround Sustainable Development, including its Principles, Processes and Concepts, its Deciding factors, and Potentials it holds. Students will get the information and Importance of the MDGS. Students will be aware about National Environmental Policy.

POST GRADUATE (PG)

- certifications) as tour operators, itinerary planners, tour guides and so on. Also those with PhD or relevant master's can also opt to teach the subject at school, college or masters level or may be involved in developing educational content for the relevant subject. Indeed, it is correctly said that geography is everywhere and opens our eyes to the world we live in, and so for those curious souls who love to know more and explore about the earth, the road towards geography may lead you to your final destination! Get going...
- 5) Geographers provide their services in diverse fields. There are comparatively few geographers so they are in high demand at national and international level. The remuneration depends on the potential, experience, seniority and type of organisation. Generally private companies pay awesome wage along with other benefits, when compared with the government and public organisation. In the field of geography, a qualified person can expect a starting salary somewhere around Rs. 15,000 25,000 per month. The senior persons in private sector may draw more than Rs.1,20, 000 per month. Consultants also get attractive consultancy fees.
- 6) **Drafter:** He/she associate closely with engineers and architectures. It involves planning, housing and development projects in terms of their location and utilization.
- 7) **Government employer:** Central government agencies employ geographers for mapping, intelligence work and remote sensing interpretation. State and local governments employ geographers on planning and development commissions.
- 8) **Urban and regional planner:** Concerned with planning, housing and Development projects with respect to their location and utilization of available land-space.
- 9) **GIS specialist:** City governments, county agencies and other government agencies and private groups are often in need of experienced GIS professionals
- 10) **Climatologist:** Agencies viz. National Weather Service, news media, the Weather Channel and other government entities occasionally need climatologist. A geographer with experience and vast coursework in meteorology and climatology serves as the best climatologist.
- 11) **Transportation manager:** The regional transit authorities or shipping, logistics and transportation companies requires in transportation geography.
- 12) **Environmental Manager:** The environmental assessment, clean-up and management companies require a geographer for environmental impact reports. It's often a wide-open field with tremendous growth opportunities.
- 13) **Science (Geography) writer**: One can serve as a science writer or a travel writer for a magazine or newspaper.
- 14) **Researcher:** Many Government and non-government institutes along with research centres offers several career options for qualified geographers with numerous specializations.

15) Teacher/Professor: The college teachers, school teachers and
university teacher. Depending upon the experience and degrees obtained.
16) Demographer: In government and research organizations.
17) Government officer: Geographical Survey of India/State and Central government provides job opportunities.
18) Careers in Indian Navy: The Indian Navy is the seventh largest in the
world and is a well knit, cohesive fighting force with tri dimensional
capabilities. The Indian Navy provides you all the training you need
and help you make the most of what you have your talents, your skills,
your spirit and your aspirations. You get very challenging job and get
chance to travel widely.

Semester-I

Gg. 111- Principles of	1) To acquaint the students with basic knowledge of Economic
Economic Geography	Activities.
	2) To know the fundamental concepts of economical sector and
	geographical factors.
Gg. 112 - Principles of	1) To acquaint the students with basic knowledge of Population
Population and Settlement	and its characteristics.
Geography	2) To acquaint the students with basic knowledge of Settlements
	and its characteristics.
	3) To know the fundamental concepts of Population/
	Demography/Settlements.
Gg. 113 - Principles Of	1) To acquaint the students with basic knowledge of atmosphere,
Climatology	weather and climate
	2) To know the fundamental concepts of climatology
	3) To understand various weather phenomena
	4) To identify climatic differentiation on the earth
	5) To acquire the knowledge of weather forecasting
Gg. 114: Principles of	1) To acquaint the students with basic knowledge of earth
Geomorphology	surface.
	2) To know the fundamental concepts of Geomorphology.
Gg. 115: Practical In	1) To introduce the students with basic knowledge of Practical
Geography	works related to geographical aspects.
	2) To know the importance of geographical knowledge with skill
	for better development.

Semester-II

Gg. 211: Geographical	1) To gain the geographical knowledge from the ancient to current
Thoughts	era.
	2) To introduce the Ancient Indian thoughts with comparative concepts in the world.
Gg. 212: Social and Cultural	1) To study the Social as well as Cultural situation in the different
Geography	parts in the world.
	2) To analyse the relationship between the geography and socio- cultural factors.
Gg. 213: Remote Sensing	1) To gain new knowledge with technical approach.
	2) To acquire the knowledge of Sattelites, their functions, systems and data capturing system.
Gg 214: Geo-Statistical	1) To provide the statistical skill & interprete them with geographical
Methods	locations.
Gg. 215: Practical of	1) To introduce the students with basic knowledge of Practical
Computerize Data Analysis	works related to geographical aspects.
Techniques In Geography	2) To know the importance of geographical knowledge with
	skill for better development.

Semester-III

Gg. 311: (A) Regional Geography Of U. S. A.	 To discuss the geography of the United States as a field of regional study. To understand the major geographical regions of the United States. To illustrate Natural Resources, Agriculture and Transportation. To illustrate and define regions as a means of interpreting the complexity of the United States.
Gg. 312: Environmental Geography	 To understand components, interactions and nutrient cycles in the environment. To acquire a set of economic, aesthetic, social and cultural values for environment. To aware about the climatic change and degradation of environmental. To promote individuals and social groups to involve actively at all levels in environmental decision making.
Gg. 313: Geographical Information System	 To acquaint the students with the concepts of GIS. To acquire theoretical knowledge of tools and techniques of GIS. To develop and to qualify the students for practical usage of GIS. To develop the students for research and planning.

Gg. 314: Urban Geography	 To develop awareness among the students about the data sources and their application to understand and evaluate the spatial patterns and processes of urbanization. To encourage the students to study the urban morphology and urban functions with special reference to India. To understand the evolution of urban settlements with relevant theories and models. To study the fundamental concepts of urban settlement. To examine the contemporary urban issues and suggest remedial measures on them. To acquire the knowledge about the planned cities in India.
Gg. 315: Practical Of Physical Geography With The Help Of G.I.S	 To gain a basic and practical understanding of GIS concepts, techniques. To enable students to perform basic GIS analysis. To introduce ILWIS and provide practical experience of a range of GIS functions. To learn utilization of ILWIS tools to perform analysis in Physical Geography. To know utilization of GIS in the context of business needs and IT strategies. Have ability to survey agricultural land, calculation of farm area and to convert in different units.

Semester-IV

Gg. 411: (C) Geography Of Rural Settlement	 To study the fundamental concepts of rural settlement. To understand and evaluate the spatial patterns of rural settlements. To study the rural morphology and rural functions with special reference to India. To understand the evolution of rural settlements with relevant theories and models. To examine the contemporary rural issues and suggest remedial measures on them.
Gg. 412: (C) Urban Geography	 To understand and evaluate the spatial patterns and processes of urbanization. To study the urban morphology and urban functions with special reference to India. To understand the evolution of urban settlements with relevant theories and models. To study the fundamental concepts of urban settlement. To examine the contemporary urban issues and suggest remedial measures on them. To acquire the knowledge about the planned cities in India.

Gg. 413 (A) Research Methodology	 To create an awareness about research in the field. To make a scientific view about the geographical phenomenon. To develop the research ability and get solution on various problems.
Gg. 414: Watershed Management & Planning	 This course is introduced to prepare the students for better planning of watershed. Watershed planning and management is easy and authentic with the help of GIS and Remote Sensing techniques. To develop the PG students for research and planning, this course is introduced. Number of job opportunities are available for the students of geography in the field of GIS, RS and watershed planning department.
Gg. 415: Practicals Of Topographical Maps, Aerial Photographs, Satellite Imageries & Surveying	 To introduce the students with basic knowledge of topographical maps, aerial photographs and satellite imageries. To know the importance and techniques of interpretation of topographical maps, aerial photographs and satellite imageries. To identify and study the relationship existed between various natural and cultural features depicted in the maps, photographs and imageries. To introduce the students with basic principles of GPS and it's functioning. To give practical knowledge about survey using GPS receiver. To prepare the survey layout using post-processing software.

Department of Marathi

Programme Outcomes: B.A. Marathi

Department of Marathi	After successful completion of three year degree program
Programme Outcomes	in Marathi a student should be able to; १. नाटकाची अभिरुची भिकभित करून घेतो तिच नाटकाच्या भचभकत्सक अभ्यािची क्षमता भिकभित होते.
	२. मराठी एकाांभककाांच्याद्वारे भिद्यार्ाां मध्ये लेखन
	कौशल्यभिषयक दृष्टीकोन भनमााण करता येतो.
	3. िांिादाची क्षमता भिकभित करता येते आभण िाभषक कौशल्य भिकभित करणे.
	४. दभलत एकाांभककाांमधून िामाभिक भनमााण करून िमािकायाािाठी भदशा दाखभिता येते.
	५. एकाांभककाांची आस्वाद क्षमता भिकभित होते.
	६. लभलत गद्यातून र्ोर पुरुष ि स्रीयाांच्या
	िीिनचररत्रातून नीती-आचरण भचांतनशीलता ि
	िािात्मकता िूत्राांचा पररचय करून देता
	येतो तिच स्री ि पुरुष याांच्या
	िीिनाच्या भिभिध पैलूां चे दशान घडभिता येते.
	७. मध्ययुगीन मराठी िाड्मयाच्या भनभमातीमागील प्रेरणा,
	इ्भतहाि, स्वरूप ि ैिभशष्टये तिच भिभिध
	िाभहत्यकृतीचां ा स्ूल पररचय करून घेता येतो.
	८. िारकरी िांप्रदायातील िांतिकीच्यां ा
	काव्यभनभमातीचे स्वरूप, बखर िाड्मयाचे स्वरूप ि
	िैभशष्टयाांचा पररचय करून देऊन बखर ि
	अ <u>ू</u> ंग याांची आस्वाद क्षमता
	भिकभित करता येते.

1	a the substantial forms and the substantial forms
	९. नाट्य अभिरुची भिकभित करता येते तिच नाट्य
	िां कल्पना नाट्य आस्वादाची डोळि क्षमता
	भिकभित करता येते.
	१० िाषेचे स्वरूप, काया, िाषा उत्पतीचे भिद्ाांत,
	िाषाकुल
	िांकल्पना, प्राांभतक िद, मराठीच्या प्रमुख बोलीचा पररचय,
	िाषाभिषयक अिलेले गैरिमि, मराठीिरील अन्य
	िाषाांचा पडलेला प्रिाि तिच मराठी िाषा
	उत्पतीभिषयीची मते
	िाणून घेऊन मराठीची पूिापीठीका लक्षात घेता येते.
	११ मराठी व्याकरणाची आस्वाद क्षमता भिकभित करून
	आकलन क्षमता भिकभित करणे.
	१२ लोकरां ग्रिमीची िांकल्पना, स्वरूप, ैिभशष्ट्रये,
	लोकिगभहत्य
	ि लोकरां ग्रिमी याांचा परस्परिांबांध तिच िही,
	िारुड, दशाितार,तमाशा, लोकनाट्य, पर्नाट्य,
	ित्यशोधक
	िलै,ररां गणनाट्य ि कीतान याांच्या स्वरूप,
	ैिभशृष्टयाांचा पररचय करून देऊन
	लोकिाभहत्यभिषयक अभिरुची भिकभित करता येते.
	१३ हकश्राव्य माध्यमाांचा पररचय करून घेऊन त्यािाठी लेखन
	ि िांिाद कौशल्य याांचा पररचय करून
	देऊन दकश्राव्य माध्यमांचे काया, उपयुक्तता,
	कायाक्रमांिाठी लेखन तांत्र ि
	दूरभचत्राणीिाठी भनिदन कौशल्य भिकभित करता येते.
	१४ अधुभनक िमाि माध्यमाांचा पररचय करून घेता
	येतो त्याचबरोबर त्याांचे काया, उपयुक्तता आभण ईमेल,
	ब्लॉग फेिबुक, भिटर, व्हाटिअप, युट्युब यािाठी
	लेखन तांत्र ि भनिदन कौशल्य भिकभित करता येते.
	१५ भनबांध लेखनाचे स्वरूप, घटक, प्रकार याांचा पररचय करून
	घेता येतो त्याचबरोबर भनबांध लेखनाचा िराि करून
	घेऊन भनबांध लेखनाचे कौशल्य भिकभित करता येते.
	१६ कर्ेची अभिरुची भिकभित करून घेतो तिच कर्ेच्या
	भचभकत्सक अभ्यािाची क्षमता भिकभित होते.
	१७ यशस्वी उद्योिकाांच्या चररत्राद्वारे भिद्यार्ांमध्ये व्यािाभयक
	दृष्टीकोन भनमााण करता येतो.

	१८ िांिादाची क्षमता भिकभित करता येते आभण िाभषक कौशल्य भिकभित करणे.
	१९ उत्तम दिगाची व्याििाभयकिृत्ती भनमााण करून यशस्वी उद्योगाची भदशा दाखभिता येते.
	२० कादांबरीची आस्वाद क्षमता भिकभित होते.
	२१ पौिात्या ि पश्चचमात्य िाभहत्यशास्त्रातील भिभिध िांकल्पना, िाभहत्याचे स्वरूप, िाभहत्याचे प्रयोिन
	आभण
	िाभहत्याची भनभमाती प्रभक्रया याांचा स्र्ूल पररचय करून घेता येतो.
	२२ नाट्य अभिरुची भिकभित करता येते तिच नाट्य िांकल्पना नाट्य आस्वादाची डोळि क्षमता भिकभित करता येते.
	२३ मराठी व्याकरणाची आस्वाद क्षमता भिकभित करून आकलन क्षमता भिकभित करणे.
Programme Specific Outcomes	 एकाांभकका या नाट्य प्रकारचे स्वरूप, िाटचाल, लेखन स्वरूप ि ैिभशष्टये िाणून घेणे.
	२. िाड्मयीन अभिरुची भिकभित करणे.
	३.
	िं। टचाल याांची माभहती करून घेणे ि लभलत
	ग्द्य लेखनातील भिभिध प्रकाराांची , बदलत्या रूपाांची
	ओळख करून घेणे. ४. ेांेादािाठीची भिभिध िाभषक कौशल्य
	४. । ााा दि।। ाठाचा । मामचा ामषक काशल्प भिकभित करणे.
	५. मध्ययुगीन मराठी ি।ड्मयाचा इभतहाि, भनभमातीमागील प्रेरणा, स्वरूप, িैभशष्टये याांचा पररचय करून घेणे.
	६. मराठीच्या काभलक िंदाांचे स्वरूप, प्राांभतक िंद, बोली िाषाांची स्वरूप, िैभशष्टये , िाषेभिषयक अिलेले गैरिमि याांची ओळख करून घेणे.
	७. लोकरांगिूमीची िांकल्पना, स्वरूप, िैभशष्ट्ये , लोकाभहत्य ि लोकरांगिूमी याांचा अिलेला परस्पर िांबांध िम्नून घेणे.
	८. आधुभनक िमाि माध्यमाांचा पररचय, काया, उपयुक्तता, त्यािाठीचे लेखन कौशल्य आभण भनिदन कौशल्य याांचा पररचय करून घेणे.

९. भनबांध लेखनाचे स्वरूप, घटक, प्रकार िमूिन घेणे
ि भनबांध लेखनाचे कौशल्य आत्मात करणे.
१० उत्तम दिगाची व्याििाभयकिृत्ती भनमााण करून यशस्वी
उद्योगाची भदशा दाखभिणे
११ िांिादािाठीची भिभिध िाभषक कौशल्य
भिकभित करणे.
१२ पौिात्या ि पश्चचमात्य िाभहत्यशास्त्रातील भिभिध
िांकल्पना, िाभहत्याचे स्वरूप, िाभहत्याचे प्रयोिन
आभण
िाभहत्याची भनभमाती प्रभक्रया िमािून देणे.
१३ नाटकातील िुखाश्त्मका-शोकाश्त्मका याांचे स्वरूप ि
ि <u>ै</u> भशष्टये

Course Outcomes B. A. Marathi

गाह बाग बी ग गाउँ व राज	
एफ.वाय.बी.ए. मराठी जनरल	१) मराठी िाड्मयातील कर्ा या मुलूित िाड्मय प्रकारची
(ववविष्ट वाड्मय प्रकारचा	ओळख होण्याि मदत होते.
अभ्यास-कथा)	२) कर्ा, भतचे स्वरूप, घटक आभण प्रमुख प्रकाराांचा पररचय
	भिद्यार्थ्ां ना होतो.
	३) मराठी कर्ेच्या आिरच्या िाटचालीचा पररचय
	भिद्यार्थ्ाांना होतो.
	४) कर्ेच्या अभ्यािाची दृष्टी भिद्यार्थ्ाां मध्ये रुिभिण्याि
	िदर अभ्यािक्रमाची मदत होते.
एस.वाय.बी.ए. मराठी जनरल-	१) भिद्यार्थ्ाांना ैिचाररक गद्य लेखनाच्या परांपरेची ओळख
वैचाररक गद्य लेखनाचा अभ्यास	करून घेता आली.
(िेतकऱ्याचा आसूड –महात्मा	२) भिद्यार्थ्ाांना महात्मा फुले याांचे िीिन, काया ि त्याांची
फुले)	ैिचाररक
	िडणघडण याबाबत माभहती िाणून घेता आली.
	३) शेतकऱ्याचा आूड पुस्तकातील ैिचाररक आशयाची स्वरूप
	ြိ်
	िैभशष्ट्रयाांचा तिच िाड्मयीन गुण िैभशष्ट्रयाांची ओळख
	करून घेता आली.
	४) चररत्र-आत्मचररत्र लेखनाचे िामाभिक ि िाड्मयीनदृष्ट्या
	महत्व भिद्यार्थ्ाांना िमिण्याि मदत होते.
	५) मराठीतील चररत्र ि आत्मचररत्र लेखन परां परे चा पररचय
	भिद्यार्थ्ाांना करून घेता येतो.
	६) चररत्र -आत्मचररत्र लेखनाची िामाभिक ैिभशष्टयपूणाता ि
	लेखनपद्ती याबाबत प्रात्यभक्षकाच्या माध्यमातून भिद्यार्थ्ाांना
	िाणीि करून घेता येते.
एस.वाय.बी.ए. मराठी एस-१ -	१) भिद्यार्थ्ाांना कादांबरी या िाड्मय प्रकारची ओळख करून
वाड्मय प्रकारचा अभ्यास	घेता आली.
(कादंबरी व कववता)	२) भिद्यार्थ्ाांना आधुभनक काळातील कादांबरीच्या प्रेरणा िमून
(11411111111111111111111111111111111111	घेता येतात.
	३) अिकाळी पाििाच्या दरम्यानची गोष्ट या कादांबरीचा आशय,
	त्यातील िांघषा, पात्रभचत्रण याांचे प्राभतभनभधक स्वरुपात अध्ययन
	करण्याि मदत होते.
	४) अिकाळी पाििाच्या दरम्यानची गोष्ट या कादांबरीतील ग्रामीण
	िीिनास्तिाचे स्वरूप भिद्यार्ी िमून घेतात.
	५) कादांबरीचे िाड्मयीन मूल्यमापन करून घेण्याची दृष्टी
	भिकभित होते.
	[६) कभिता या िाड्मय प्रकारचे स्वरूप, िैभशष्टये, िाटचाल,
	प्रकार
	ि घटक याांचा पररचय भिद्यार्थ्ांना करून घेता येतो.
	। वटक याचा परस्यय मिद्याप्ााना करून वता यता. ७) माझे भिद्यापीठ या कभिता िांग्रहातील िीिन
	ि। भिणांचा शोध भिद्यार्ी घेतात.
	८) कभितेचे िाड्मयीन आकलन ि मूल्यमापन करण्याची
	भिद्यार्थ्ाांची दृष्टी भिकभित होते.

एस.वाय.बी.ए.	१) पौिात्या ि पश्चचमात्य िाभहत्यशास्त्रातील भिभिध िांकल्पना
मराठी वविषस्तर -२	याांचा स्रूल पररचय भिद्यार्थ्ाांना करून घेता येतो.
(सावहत्य ववचार-भारतीय व	२) िाभहत्याचे स्वरूप, िाभहत्याचे प्रयोिन आभण
पाश्चात्य)	िाभहत्याची भनभमाती प्रभक्रया याांचा भिद्यार्थ्ाांना पररचय होतो.
,	३) ि। भहत्याचे भिभिध उपप्रकाराांचे स्वरूप ि ैि भशष्ट्रयाांचा स्ूल
	पररचय भिद्यार्थ्ांना करून घेण्याि मदत होते.
	४) िाभहत्य भनभमातीच्या प्रधान ि गौण कारणांची ओळख
	भिद्यार्थ्ाांना करून घेता येते.
	(५) िाभहत्याच्या िाषेचे स्वरूप ि शब्द शक्तीचे प्रकार िम्निन
	चेता येतात.
	६) िाभहत्यातील रि प्रभक्रया िांस्कृत िाभहश्त्यकांनी मांडलेल्या
	रिभिचाराच्या आधारे भिद्यार्थ्ाांना िम्मूिन घेता येतात.
	७) िाभहत्यातून प्राप्त होणाऱ्या आनांदाचे स्वरूप िाणून घेता येते.
	८) िा्भ्हत्याची आस्वाद प्रभक्रया भिद्यार्थ्ाांना िमूिन घेण्याि
	मदत होते.
एस.वाय.बी.ए. मराठी SEC —	१) मुभित शोधनाचे स्वरूप ि आचयक्ता िाणून घेता येते
लेखन कौिल्ये	तिच भिद्यार्थ्ाांना मुभित शोधनाचे कौशल्ये आत्मात करता
	येते.
	२) मुभित शोधनाच्या खुणा, अर्ा आभण त्याांचे उपयोिन
	करण्याि भिद्यार्थ्ाांना मदत होते.
	३) भिरामभचन्हे ि लेखनभिषयक भनयमाांचे स्वरूप भिद्यार्थ्ाांना
	िाणून घेता येतात.
	४) मुभितशोधनाचा िराि करण्याि मदत होते.
	(พ์) ँिानशील लेखनाचे स्वरूप ि ैिभशष्टये िाणून घेता
	येतात.
	६) कर्ालेखन ि नाट्य लेखन प्रभक्रया भिद्यार्ी िमून घेतात.
	७) भिद्यार्ी कर्ालेखन ि नाट्य लेखन याांचा िराि करतात
	८) भिद्यार्थेाां मध्ये िानशीलता रुिभिता येते.
एस.वाय.बी.ए. मराठी MIL –	१) ्रित्तपत्र या मुभित माध्यमाांचा भिशेष पररचय करून घेता येतो
मुवित माध्यमांसाठी लेखन	तिच ्रितपत्र माध्यमाांचे काया, उपयुक्तता िाणून घेता येते.
	२) ्रित्तपत्र माध्यमांिाठी बातमी लेखन ि ाभहरात
	लेखन तांत्र भिद्यार्ी अगत करतात.
	३) ृित्तपत्र माध्यमांिाठी ृित्तलेख लेखन, स्तांि ि िदर लेखन
	त्यांचे स्वरूप ि तांत्र भिद्यार्ी ाणून घेतात.
	४) निोिाणी या श्राव्य माध्यमाांचा भिशेष पररचय करून घेता
	येतो तिच निोिाणी माध्यमांचे काया, उपयुक्तता िाणून
	घेता येते.
	६) निोिाणी माध्यमांिाठी िाषण लेखन ि श्रुभतका लेखन
	तांत्र भिद्यार्ी अगत करतात.
	७) निोिाणी माध्यमांिाठी कराियाच्या
	युिकाांिाठीच्या कायाक्रमाच्या लेखनाचे स्वरूप ि तांत्र
	भिद्यार्ी िाणून घेतात.
	८) िरकारी ि खािगी निोिाणी माध्यमांिाठी
	कराियाच्या भनिदनाचे स्वरूप ि तांत्र भिद्यार्ी आत्माित
	करतात

टी.वाय.बी.ए.मराठी जनरल	१) मराठी िाड्मयातील एकाांभकका ि लभलत गद्य या मुलूित
· · ·	
(ववविष्ट वाड्मय प्रकारचा	िाड्मय प्रकारची ओळख होण्याि मदत होते.
अभ्यास-एकांवकका व लवलत	२) एकाांभ्कका ि लभलत गद्य भतचे स्वरूप, िांकल्पना,
गद्य)	िेभशष्ट्रये,
	िाटचाल आभण प्रमुख प्रकाराांचा पररचय भिद्यार्थ्ाांना होतो.
	४) मराठी िाड्मयातील एकाांभकका ि लभलत गद्य याांच्या
	अभ्यािाची दृष्टी भिद्यार्थ्ाां मध्ये रुिभिण्याि िदर
	अभ्यािक्रमाची मदत होते.

	िटके भिमुक्त ि मुस्लीम िाभहत्य प्रािहाांची भिभिध	
	िाड्मयं प्रकारातील िाटचाल भिद्यार्थ्ाांना	

	िाणून घेता होते.
	३) स्वातांत्र्योत्तर कालखांडातील दभलत, आभिदािी, िटके भिमुक्त ि मुस्लीम िाभहत्य प्रािहाांच्या प्राभतभनभधक िाभहत्यकृतीचां ा अभ्याि भिद्यार्थ्ाांना िोप्या पद्तीने
	करण्याि मदत होते.
मराठी पेपर-६ सामाज भाषाववज्ञान	१) िमाििाषा भिज्ञानाचे स्वरूप आभण या अभ्याि क्षेत्राची व्याप्ती भिद्यार्थ्ाांना िमिण्याि मदत होते. २) िाषा, िमाि, िांस्कृती यातील परस्परिांबांध
	िाणून घेऊन त्यानुिार िाषेतील स्तरिदाांचे स्वरूप भिद्यार्थाांच्या लक्षात येण्याि मदत होते.
	३) िमाििाषाभिज्ञानातील पायािूत िांकल्पना
	भिद्यार्थ्ाांना
	िमूिन घेता येते.
	४) बोलीच्यां ा अभ्यािाचे िाषािैज्ञाभनक महत्व
	भिद्यार्थ्ाांना लक्षात येते. ५) खान्देशातील भनिडक बोलीचां ी िमाििाषा
	भिज्ञानाच्या अांगाने िाणिणारी ैिभशष्टये भिद्यार्थ्ाांच्या
	लक्षात येते.
मराठी पेपर-७ मध्ययुगीन पद्य रचना	१) मध्ययुगीन कालखांडातील पद्य ्रिाड्म्यातील ैिभिध्यपूणा
प्रकारांचा अभ्यास (आख्यान काव्य आवि	रचना प्रकाराांचा अभ्याि करण्याि भिद्यार्थ्ाांना मदत होते.
लावि)	२) मध्ययुगीन कालखांडातील प्रमुख पद्य रचना प्रकाराांचे स्वरूप भिद्यार्थ्ाांना िाणून घेता येते.
	३) मध्ययुगीन कालखांडातील आख्यान काव्य या रचना
	प्रकाराचे स्वरुपभिशेष भिद्यार्थ्ांना िाणून घेता येते.
	४) प्राभतभनभधक आख्यान काव्य या रचनाांच्या अनुषांगाने
	अिांग या रचना प्रकाराचा अभ्याि करण्याि
	भिद्यार्थ्ांना मदत होते.
	५) मध्ययुगीन कालखांडातील लािणी या पद्य रचना प्रकाराांचे स्वरुपभिशेष भिद्यार्थ्ांना िाणून घेता
	अले.
	६) प्राभतभनभधक िारुड रचनाांच्या अनुषांगाने लािणी
	या रचना प्रकाराचा अभ्याि करण्याि भिद्यार्थ्ाांना मदत
	होते.

मराठी पेपुर-८ खानदेिातील	१) खानदेशातील लोिकीिन आभण लोिकाभहत्य याांचे
लोकसावहत्य	परस्पराांशी अिलेले अनुबांध भिद्यार्थ्ाांना िाणून घेता होते.
	२) खानदेशातील अभहराणी, लेिा, गुिर, तािडी या
	बोलीतील लोकगीते, लोककर्ा,म्हणी, िाक्प्रचार, उखाणे
	याांचा पररचय होतो.
	३) खानदेशातील लोकनाट्याचे (तमाशा,गोांधळ,िही गायन)
	याांचे स्वरूप भिद्यार्थ्ाांना िाणून घेता येते.
	४) खानदेशातील आभदािीच्यां े ा लोकािभहत्याचे
	(लोकगीते,लोकनाट्य,लोककर्ा) याांचे स्वरूप
	भिद्यार्थ्ांना
	िमूने घेण्याि मदत होते.

	छात्रोां को पररभचत कराना।
GE-I (B) HINDI : खानदेश का लोक	1) लोक िाभहत्य ैिध्दाांभतकी ि छात्रोां को पररभचत
िाभहत्य	कराना।
	2) खानदेश के लोक िाभहत्य और लोक िांस्कृभत
	िे छात्रोां को अिगत कराना।
	3) छात्रोां को खानदेश की प्रमुख बोभलयाँ : अभहराणी, लेिा
	, और आभिदा ि क िंाभहत्य ि े अगत
	कराना।
	4) लोकगीत, लोककर्ा, लोकनाटय और लोकोत्ि
	्र आभद के माध्यम िें खानदेश की लोक िा ं स्कृभत
	का िाक्षात्कार कराना।
	5) लोकगीत, लोककर्ा, लोकनाटय और लोकोत्ि
	आभद र्
	िे िांबांभधत प्रभतभनभतध िाभहत्य रचना का
	अध्ययन और भिचलेषण करना।

Department of History

UNDER GRADUATE (UG)

Department of	After successful completion of three year degree program in (B.A.
Electronics	HISTORY) a student should be able to;
Programme	Understand basic concept of History.
Outcomes	• Understand to the student aware of the application of the various concept in History.
	To write study tour report.
	 Increasing student interest in History subject.
	Contemplate the concept of History.
	 Studying human values among students from various legend in History.
	• To stimulate patriotism, nationalism and patriotism among the
	students through the subjects of History.
Programs Specific Outcome	 The syllabus provides chronological sequence of the "units" of the subject matter with proper placement of topic with their linkage for better understanding.
	 Develop an interest in student to study the history as discipline.
	 For making learning of history more relevant, meaningful and interesting.
	• Develop positive attitude and appreciate contribution of freedom fighters towards the independents of India.
	• The syllabus provides chronological sequence of the "units" of the subject matter with proper placement of topic with their linkage for better understanding.
	 Develop an interest in student to study the history as discipline.
	 For making learning of history more relevant, meaningful and interesting.

Course Outcomes Semester-I &II (FYBAHISTORY)

After completion of these courses students should be able to;	
Course	Outcomes
HIS- History of India	 To introduce various perspectives of the Indian Freedom Movement. To develop the spirit of nationalism among students. To bring an awareness among the students as responsible citizen of the country. To inculcate Liberty, Equality, and Fraternity among the students. To inculcate the rational thinking among the students.

Semester-III & IV (SY BA. HISTORY)

After completion of these courses students should be able to;	
Course	Outcomes
HIS-Hstory of Maratha	 To create and enhance interest about regional History among the students. To acknowledge students how SHIVAJI MAHARAJ created the empire inadverse circumstance. To motive students for the research work of the Maratha History. Useful for the preparation of the competitive examination. To able to understand the leadership and its characteristics.

Semester-V &VI (TY BA. HISTORY)

After completion of these courses students should be able to;		
Course	Outcomes	
HIS- History of Modern Europe	 Career and job oriented syllabus (MPSC,UPSC,NET,SET, RailwayBoard and staff selection). To develop the skill and opportunities among the students. Job oriented syllabus newly introduce i.e.archive in india and tourism business etc. To make awareness about word History. To make awareness abaut resaech. Syllabus related to tour and excursion, visit and report writing. 	

Department of Political Science

Programme Outcomes: B.A. Political Science

Department of	After successful completion of three year degree program in Political
Geography	Science student should be able to;
Programme Outcomes	 Students enable to develop and be able to demonstrate skills in conducting as well as presenting research in political science. Students enable to analyze political and policy problems and formulate policy options. Students enable to develop academic proficiency in the subfields of Indian Government and Politics, Comparative Government, International Relations, Public Administration, Political Theory and Political Ideology. Students enable to discuss the major theories and concepts of political science and its subfields, and also deliver thoughtful and well-
	articulated presentations of research.
Programme	Can Prepare for Competitive exams.
Specific Outcome	Can admit to MA Politics, LLB and MBA etc.
	 Work as a teacher in colleges, Jr. Colleges, high schools & schools. Serve as political party member, political adviser, and well citizen of India.

Course Outcomes F.Y.B.A. Political Science

After completion of these courses students should be able to;	
Course	Outcomes
DSC - A - I Indian	1) Students enable to explain the Constitutional process.
Constitution	2) Students enable to understand the process, concept and working of
	Indian constitution.
	3) Students enable to understand the Making Process, Preamble, Salient
	features of Indian Constitution.
	4) Students enable to understand the Constitutional Bodies and
	Amendment Process.
DSC - A - II	1) Students enable to explain the Government of Union and State.
Indian	2) Students enable to understand Judiciary and Constitutional
Government	Commission.
	3) Students enable to understand the Composition, Powers and Functions,
	Law making process of Union and State's Legislature.
	4) Students enable to understand the Comptroller and Auditor General,
	Lokpal, Lokayukta, Election Commission of India.
	5) Students enable to understand the Centre-State Relation and Civil
	Services .

Semester – III

After completion of these courses students should be able to;		
Course	Outcomes	
DSE - 1A Reading	1) Students enable to understanding the Mahatma Gandhi's Truth,	
Mahatma Gandhi	Non Violence, Satyagrah, Trusteeship and Hind Swaraj and	
	Nationalism.	
	2) Students enable to understand the Theory of State and Religion.3) Students enable to understand the Thought of Gandhiji Regarding	
	Social Welfare.	
	4) Students enable to understand the Gandhiji's View's on Health	
	Cleanliness.	
	5) Students enable to understand the Gandhi's View's on Farmer,	
	Worker, Tribal Community and Minorities.	
DCE 24 C	4) 0, 1 , 11 , 1 , 1, 1 , 1 , 1 , 1 , 1	
DSE – 2A Government and Politics of America	1) Students enable to understand the Historical Background of America.	
and Fondes of America	2) Students enable to understand the Silent features of American	
	Constitution and Amendment.	
	3) Students enable to understand the Government and Administration	
	of America	
	4) Students enable to understand the Political Parties and Party	
	system of America.	
DSC – 1C Introduction	1) Students enable to understand the Historical , Geographical,	
to Administration of	Socio-Economical and Political Background of Maharashtra.	
Maharashtra	2) Students enable to understand the Role of State Secretariat	
	(Mantralaya).	
	3) Students enable to understand the District Administration.	
	4) Students enable to understand the Administration of Maharashtra-	
SEC- 1 Introduction of	Silent Features.	
Research Methodology	1) Students enable to understand the Meaning, Definition, Objective	
in Political Science	& Significance of Research Methodology.	
	2) Students enable to understand Steps in Research Methodology.	
	3) Students enable to understand the Report writing in Research	
	Methodology.	
	2) 4) Students enable to understand Data Collection, Sampling	
	Method.	

Semester – IV

After completion of these courses students should be able to;		
Course	Outcomes	
DSE – 1B Reading Dr.	1) Students enable to understand the Social Thoughts on Equality,	
Ambedkar	Fundamental Rights, Social Justice and Reservation.	
	2) Students enable to understand the Political & Religion Thought.	
	3) Students enable to understand the Thought on Education.	
	4) Students enable to understand the Dr. Ambedkar's Views on	
	Political Parties, Freedom of Press.	
	5) Students enable to understand the Dr. Ambedkar's Views on	
	Labour Organization.	
DSE – 2B Government	1) Students enable to understand the Historical Background of	
and Politics of China	China.	
	2) Students enable to understand the Silent features of Chinas	
	Constitution and Amendment Process.	
	3) Students enable to understand the Government and	
	Administration of China.	
	4) Students enable to understand the Political Parties and Party	
	System of China.	
DSC – 1D Introduction		
to Local and District	1) Students enable to understand the Rural and Urban	
Administration of	Administration in Maharashtra.	
Maharashtra	2) Students enable to understand the Position, Role and Function of	
	District Police Superintendent (SP).	
	3) Students enable to understand the Constitutional and Legal	
	Board of Maharashtra (Structure and Functions).	
	4) Students enable to understand the Minorities Development	
	Board of Maharashtra.	
SEC – 2 Election	1) Students enable to understand the Meaning and Definition of	
Management	Election Management.	
	2) Students enable to understand Election Process and Campaign.	
	3) Students enable to understand the Election Methods and Political	
	Participation.	
	4) Students enable to understand Voter Registration System.	
	,	

Semester – V

After completion of these courses students should be able to;		
Course	Course Outcomes	
TYBA (DSC-1 E)	1) Students enable to explain the Dadabhai Naoroji's Thought of	
Indian Political	Economic, Eco- drain and Moral Exploitation Theory.	
Thinker Part - I	2) Students enable to understand the Lokmanya Tilak's Political Thought,	
	Chatusutri and Views on Social Reform.	
	3) Students enable to describe the Role of Indian Freedom Movement.	
	4) Students enable to understand the Mahatma Gandhi's Thoghts on Truth,	
	Non Violence, Satyagrah and Trust ship concept etc.	
TYBA (DSE-3A)	1) Students enable to explain the Aristotle's Theory of State.	
Western Political	2) Students enable to understand the Aristotle's Concept of Citizenship.	
Thinker Part – I	3) Students enable to understand the Machiavelli's Thought of Human	
	Nature and Advice to King and views on Means and End.	
	4) Students enable to understand the Rousseau's Social Contract theory	
	and its Importance.	
	5) Students enable to understand the Views on Responsible Government,	
	People's Sovereignty.	
TYBA (DSE-4 A)	1) Students enable to explain the Political Sociology & Political System.	
Political Sociology	2) Students enable to understand the Political Culture & Political	
Part – I	Socialization.	
	3) Students enable to describe the features and Role Political Participation	
	and Political Leadership.	
TYBA SEC- 3	1) Students enable to understand the Freedom of Press and Constitutions	
Journalism and	and Awareness and Socialization of Press.	
Mass	2) Students enable to understand the Introduction to Mass	
Communication	Communication.	
	3) Students enable to describe the Nature and Process of Mass	
	Communication.	
	4) Students enable to understand Criticism of Journalism and Mass	
	Communication.	
	5) Students enable to describe the Roles and Responsibilities of Journalism	
TEXTD A (CIE 4A)	and Mass Communication.	
TYBA (GE 1A) :	1) Students enable to understand the Historical Background and	
Indian Civil Services	Development of Civil services Characteristics of Civil Services and	
	Function and Role of civil Services.	
	2) Students enable to understand the Recruitment, Training and	
	Promotion.	
	3) Students enable to describe the features of Union and State Public	
	Services.	
	4) Students enable to understand Role and Importance of System of	
	Recruitment in India. 5) Students analysis to varioustand the Patingment Promose Vinds and	
	5) Students enable to understand the Retirement, Purpose, Kinds and	
	Benefits.	

Semester – VI

After completion of these courses students should be able to;		
Course	Outcomes	
TYBA (DSC-1 E)	1) Students enable to understanding the core of administration and enhance	
Indian Political	ability to get proper knowledge of rural –Urban administration.	
Thinker Part - II	2) Students enable to understand the Gram Panchayat, Panchayat Samiti and	
	Zilla Parishad in Maharashtra.	
	3) Students enable to understand the features of Municipalty, Muncipal	
	Corporation and Other Urban Local Administration.	
	4) Students enable to understand Role of Law and Order.	
	5) Students enable to describe the Constitutional and Legal Board of	
	Maharashtra (Structure and Functions).	
TYBA (DSE-3A)	1) Students enable to understand the John Stuart Mill's Views on Liberty and	
Western Political	Views on Women Liberty.	
Thinker Part – II	2) Students enable to understand the Karl Marks's Theory of Class Conflict	
	and Surplus value and Views on state or Classless and Stateless Society.	
	3) Students enable to describe the features of Karl Marks's Revolution Theory.	
	4) Students enable to understand the Thought on Harold Laski's Pluralistic	
	Theory of Sovereignty, Theory of Rights, Views on Liberty and Views on	
	Equality and Law.	
TYBA (DSE-4 A)	1) Students enable to explain the Silent features of Political Development and	
Political Sociology	Modernization.	
Part – II	2) Students enable to understand the Political Communication and Public	
	Opinion.	
	3) Students enable to describe the features and Role of Political Influence and	
	Political Legitimacy.	
	4) Students enable to understand the Meaning, Definition and Importance of	
TEVD A (CEC A)	Political Influence, Political Legitimacy.	
TYBA (SEC- 4)	1) Students enable to understand the Meaning, Definition, Nature, Scope &	
Political Journalism	Significance of Political Journalism. 2) Students analysis to an department Mathods of Political Journalisms	
Journansm	2) Students enable to understand Methods of Political Journalism.3) Students enable to describe the features of Influence of Media on Decision	
	Making Process.	
	4) Students enable to understand Role of Media in Leadership Development.5) Students enable to understand Challenges before Political Journalism and	
	Media.	
TYBA (GE 1B) :	1) Students enable to understand the Meaning and Definition, Silent Features	
Management and	of Good Governance.	
Good Governance	2) Students enable to understand Meaning, Definition and Types of	
Sou Governance	Management and Characteristic of Management	
	3) Students enable to describe the features of Functions of Management,	
	POSDCORB and Test of Good Management and Importance	
	4) Students enable to understand Administrative Leadership.	
	5) Students enable to understand Functions of Administrative Leadership.	
	-,	

Programme Outcomes & Programme Specific Outcome: M.A. Political Science

After successful completion	n of two year degree program in M.A.II (POLITICAL SCIENCE)
a student should be able to	•
Programme Outcomes	 Post Graduate Course in Political Science seeks to offer students advance knowledge of political concepts and practices in a manner that enables students to relate them to the contemporary local, national and international event. Knowledge of some of the philosophical understanding of modern politics and government and the legal principles by which political disputes are often settled. Understanding of government institutions, electoral processes, and policies in a variety of countries around the world and the ability to compare the effectiveness or impact of differing political arrangements across countries.
Programme Specific Outcome	 Competitive Examinations: It is learn that in the NET/SET, MPSC/UPSC and other competitive examinations. Public Administrator: As a Public Administrator, MA Political Science graduates can utilize their knowledge to inform policy decisions and administer those decisions effectively. Consultant: A political consultant is a professional who helps an organization make politically informed choices. Their knowledge about political philosophy comes in handy in such roles.

Semester – I

After completion of these courses students should be able to;	
Course	Outcomes
POL-111- India's Foreign	1) Students enable to understand the Meaning and Major
Affairs	Approaches to the study of Foreign policy.
	2) Students enable to understand the Domestic Determinants.
	3) Students enable to understand the External determinants:
	Global, Regional etc.
	4) Students enable to understand the Indian Foreign Policy (up to
	1990).
	5) Students enable to understand the Indians Recent affairs (After
	-1990).
POL- 112- Global	1) Students enable to understand the Factors leading to the end of
Political Issues.	cold war.
	2) Students enable to understand the Post-Cold War Issues.
	3) Students enable to understand the Contemporary issues in post
	cold war period.
	4) Students enable to understand the Challenges before New
	World Order.

POL- 113- Political Process in Indian	1) Students enable to understand the Theoretical framework for the study of State Political process.
Federation	2) Students enable to understand the Centre-State Legal and Administrative Relations.
	3) Students enable to understand the Centre- State Political Relations.
	4) 4) Students enable to understand the Social Determinants of State Politics.
POL- 114- A- Public Administration	1) Students enable to understand the Nature and Scope of Public Administration.
	2) Students enable to understand the Principles of Organization
	3) Students enable to understand the Structure of Organization.
	4) Students enable to understand the Personnel Administration.

Semester – II

After completion of these courses students should be able to;		
Course	Outcomes	
POL- 121-India's foreign	1) Students enable to understand the Recent Foreign Affairs	
Affairs	of India.	
	2) Students enable to understand the Indian approach to	
	major global issues.	
	3) Students enable to understand the Foreign Affairs and	
	Indian Ocean.	
	4) Students enable to understand the Periphery of Indian	
	Ocean.	
	5) Students enable to understand the Recent Foreign Affairs	
	of India and its neighbors.	
POL- 122-Global Political	1) Students enable to understand the Environmental Issues.	
Issues	2) Students enable to understand the Gender Issues.	
	3) Students enable to understand the Human Rights.	
	4) Students enable to understand the Terrorism at National	
DOI 122 D 141 1 D 1	and Global Level.	
POL- 123-Political Process in	1) Students enable to understand the Interstates Issues.	
Indian Federation	2) Students enable to understand the Emerging Trends in	
	State politics. 3) Students enable to understand the National Commission and	
	Constitutional Review.	
	4) Students enable to understand the Human Development Index	
	in Different States.	
POL- 124-A- Optional Paper	1) Students enable to understand the Nature and Scope of	
Indian Administration	Indian Administration.	
	2) Students enable to understand the Union Administration.	
	3) Students enable to understand the Structure of state	
	Administration.	
	4) Students enable to understand the Public Administration	
	and Information.	

Semester – III

After completion of these	After completion of these courses students should be able to;		
Course	Outcomes		
POL - 231 Socio -	1) Student knows how to introduce the key issues and details Socio –		
Political Research	Political Research Methods.		
Methods	2) Students enable to understand and analyze Socio - Political		
	Research Methods.		
	3) Student understands the expansive meaning of Socio – Political		
	Research Methods.		
	4) Student understands the Definition, Characteristics, Objectives,		
	Types and Importance of Literature Review of Socio – Political		
	Research Methods.		
POL – 232	1) Student knows how to introduce the key issues and details of the		
Comparative Political	Emergence and Development of Comparative Politics.		
Processes	2) Students enable to understand and analyze Comparative Political		
	Process.		
	3) Student understands the expansive meaning of Comparative Political		
	Process as it shapes in the arena of world politics, in the form of mass		
	mobilizations and as politics of interests.		
	4) Students enable to understand and analyze Political Party & Pressure		
	Groups.		
POL 233 International	1) Students enable to introduces the evolution and important of various		
Relations	theories.		
	2) Students know a brief history of international politics.		
	3) They understanding what are happening in the world and the levels		
	of analysis. Competing theories are presented.		
	4) Student enables to understand the Meaning, nature, Importance,		
	International Relations and International Politics.		
POL 234(B) UN and	1) Students enable to apply the theories and used to illustrate how each		
Regional	level of analysis the international system, the state, and the		
Organizations	individual- to help in organizing and conceptualizing the issues.		
	2) Student enables to understand the major issues of the twenty first		
	century- security, economics and transnational issues are presented		
	and analyzed.		
	3) Students enable to introduce the New World Order and Emergence		
	of Regional Organization.		
	4) Students know a brief history of international politics.		

Semester – IV

After completion of these courses students should be able to;	
Course	Outcomes
POL – 231 Socio - Political	1) Student knows how to introduce the key issues and details Socio –
Research Methods	Political Research Methods.
	2) Students enable to understand Socio – Political Research Methods.
	3) Student understands the expansive meaning of Socio – Political
	Research Methods.
POL – 232 Comparative	1) Student knows how to introduce the key issues and details of the
Political Processes	Emergence and Development of Comparative Politics.
	2) Students enable to understand and analyze Comparative Political
	Process.
	3) Students enable to understand and analyze Political Party &
	Pressure Groups.
POL 233 International	1) Students know a brief history of international politics.
Relations	2) They understanding what are happening in the world and the levels
	of analysis. Competing theories are presented.
	3) Student enables to understand the significance of the International Relations.
POL 234 (B) UN and	1) Student enables to understand the major issues of the twenty first
Regional Organizations	century- security, economics and transnational issues are presented
	and analyzed.
	2) Students enable to introduce the New World Order and Emergence
	of Regional Organization.
	3) Students know a brief history of international politics.

Department of Psycology

After successful completion of three-year degree program in (B.A. Psychology) a student		
should be able to;		
Programme Outcomes	1) To create interest in the subject of Psychology.	
	2) To impart knowledge of the basic concepts and modern trends is	
	Psychology.	
	3) To make the students aware of the applications of psychological	
	concepts in various fields.	
	4) To Develop the students' capability for connecting discipline	
	content to personal values and behavior.	
	5) To develop cognitive and emotive skills in the students and to develop behavior and interpersonal skills.	
	6) The help students think critically about the new information that	
	they have learned and relate it to their own life.	
	7) Provide an understanding of the explain issues underlying	
	lifespan development.	
	8) To develop the skills of positive interpersonal communication.	
	9) To impart an understanding of the various domains of human	
	relationships and process adjustment.	
	10) To develop the good decision making to career choice.	
	11) To equip the learner with an understanding of the concept and	
	process of human development across the life span.	
	12) To impart an understanding of the various domains of human	
	development.	
	13) To create interest in the subject of Psychology.	
Programs Specific	1) Awareness of self-development.	
Outcome	2) Think scientifically about surrounding human behavior.	
	3) Understand human development.	
	4) To write study tour report	
	5) Understand to relate the fundamental principles of Psychology in everyday life.	
	6) Understand to the students aware of the application of the various	
	concepts in social Psychology.	
	7) Able to understand basic concepts of Psychology.	
	8) Understand the impact of environment, society, heredity on	
	persons Behavior.	
	9) Understand the human social behavior.	

<u>Course Outcomes</u> <u>Semester-I (FYBA Psychology)</u>

After completion of these courses' students should be able to		
Course	Outcomes	
Psy - 101: Foundations of	1) To able to understand basic principles of Psychology.	
Psychology	2) To able to understand historical trends of Psychology	
	3) To able to understand Major concepts, different perspectives of Psychology.	
	4) To able to understand an overview of the applications of Psychology.	
	5) To able to understand Career opportunities in Psychology.6) To understand Roll of Biological base in human behavior.	

Semester-II (FYBA Psychology)

After completion of these courses' students should be able to		
Course	Outcomes	
Psy - 201 Introduction to social	1) To understand Emotion, Motivation and Sensory	
Psychology	Processes.	
	2) To Learn applications of various techniques of	
	Psychology.	
	3) To able to understand the basics of social Psychology	
	and understand the individual in the social world.	
	4) To able to the students aware of the application of	
	the various concepts in social Psychology in the	
	Indian context.	

Semester-III (SYBA Psychology)

After completion of these courses' students should be able to;			
Course	Outcomes		
PSY -231 Human Developmental	1) Understand to the student's concept of human		
Psychology- Early Life	development		
	2) Understand to the students process of human		
	development		
	3) Understand to the students designs for studying		
	development.		
	4) Understand to the student's Prenatal development.		
	5) Student help to understand childhood deployment.		

Semester-IV (SYBA Psychology)

After completion of these courses' students should be able to;		
Course		Outcomes
PSY -241:	Human	1) Understand to the student's concept of adolescence.
Developmental	Psychology-	2) Student help to understand self-cognitive development.
Later Life		3) Understand to the student's concept of Early Adulthood.
		4) Understand to the student's vocational choice.
		5) Understand to the student's family life cycle
		·

Semester-V (TYBA Psychology)

After completion of these courses' students should be able to		
Course	Outcomes	
PSY -351: Management of Interpersonal Relations	 Understand to the student's concept of the process of interpersonal communications. Understand to the student's communications skills & technology Student's developing an assertive communications style. Understand to the student's concept of Friendship love Marriage and intimate relationship. Understand to the student's concept of the career and work. Understand to the student's concept of the process of interpersonal communications. Understand to the student's putting together A Resume, finding companies you want to work, landing and interview polishing 	
	your interview technique. 8) Understand to the students between the difference of Career and work	

Semester-VI (TYBA Psychology)

After completion of these courses' students should be able to		
Course		Outcomes
PSY -361: span	Adjustment in life	 Understand to the student's concept of the self Understand to the student's basic principles of self – perception. Understand to the student's self-regulation, self-Efficacy, and self-defeating behavior. Understand to the student's concept of stress its effects. Understand to the student's concept of coping process.

Department of Physics

Under Graduate (UG)

After successful conbe able to;	mpletion of three year degree program in (B.Sc. PHYSICS) a student should
Programme Outcomes	 Demonstrate and think in depth to understand the minor and major concepts in scientific and technological aspects in all disciplines of physics. Enrich the knowledge through problem solving and also think methodically to draw a logical conclusion. Develop analytical abilities towards real world problems and create an awareness of the impact of Physics on the society. Develop awareness to use modern techniques, decent equipment's, and also
	the scientific knowledge to design, record and analyze the results of Physics experiments.
Programs Specific Outcome	 To have the knowledge of Physics through theory and practical's as well as knowledge of basic concepts of Physics in depth. To solve the problems in real life situations by applying various laws of Physics. To understand good laboratory practices and safety which can be useful in higher studies in Physics as well as other than Physics also. To develop the research oriented skills to handle the sophisticated
	instruments /equipment's.

Course Outcomes Semester-I (FY BSc. PHYSICS)

Stirester-1 (F1 DSC.1111SICS)		
After completion of these courses students should be able to;		
Course	Outcomes	
PHY-101: Basic	1) Apply the linear and angular momentum, conservation laws of	
Mechanics	energy to solve problems	
	2) Apply the concept of use of knowledge of mechanics to real life problems.	
	3) Understanding of the course will create scientific temperament	
	4) The students would learn about the behaviour of physical bodies	
	it provides the basic concepts related to the motion of all the	
	objects around us in our daily life.	
	5) The velocity and acceleration parameter give the knowledge	
	about how the vehicles Move.	
PHY-102: Dynamics and	1) Study the behaviour of rigid body dynamics	
Elasticity	2) To make the students to understand the dynamics involved in a	
	rigid body.	
	3) Learn how Young's modulus and rigidity modulus are defines and	
	how they are evaluated for different shapes of practical relevance	

Semester-II (FY BSc. PHYSICS)

After completion of these courses students should be able to;		
Course	Course Outcomes	
PHY-201: Electricity and Electrostatics	1) Gain knowledge of Gauss laws and solve the electric field for various geometric objects	
	2) To understand the basic concepts of Electric field and Electric Potential.	
PHY-202:	1) Enable to understand the concept of magnetic field.	
Dielectrics,	2) Understand the faradays laws of electromagnetic induction	
Magnetism And	3) Enable to familiarize with the laws of electromagnetic induction	
Electromagnetism	4) Thorough knowledge in the basic concept of electromagnetic induction	
	5) Able to derive the Maxwell"s equation in free space and material media	

Semester-III (SY BSc. PHYSICS)

After completion of these courses students should be able to;	
Course	Outcomes
PHY-301:	1) Understand the concept of thermodynamics and there laws.
Thermodynamics and	2) Understand the Heat Engine and there uses
Kinetic theory of	3) Describe the thermodynamic function and there relations
gases	4) To study Maxwell Relations and Application.
PHY-302 (A):	1) Understand he basics of diode and working of rectifier circuits and
Electronics –I	characteristics
	2) Analyse the characteristics of transistor and transistor biasing circuits
	3) Understand the basic knowledge of semiconductor physics
	4) Learn how to construct a transistor amplifier and how its gain varies
	with frequency
	5) Understand the fundamentals of codes and number system
	6) Understand the binary arithmetic, logics and boolean functions
PHY-302 (B):	1) General Block diagram & Measurements of instrumentation
Instrumentation	2) To Study transducers strain gauge, thermistor, magneto resistive
	sensor
	3) Apply the concept of use of knowledge of Instrumentation to real life problems
PHY 304: Skill	1) Know the need of renewable energy resources, historical and latest
Enhancement Course	developments
	2) Describe the use of solar energy and the various components used in
	the energy production with respect to applications like - heating,
	cooling, desalination, power generation, drying, cooking etc.
	3) Appreciate the need of Wind Energy and the various components used
	in energy generation and know the classifications.
	4) Understand the concept of Biomass energy resources

Semester-IV (SY BSc. PHYSICS)

After completion of these courses students should be able to;			
Course	Outcomes		
PHY 401: Waves, Oscillations and Acoustics	 Apply the concept of use of knowledge of Waves and Sound to real life problems Familiarise with general terms in acoustics like intensity, loudness, reverberation etc, and study in detail about production, detection, properties and uses of ultrasonic waves Analyse waves and oscillations 		
PHY 402: Optics and LASERS	 Understand the natural behaviour of aberration in lens Study the theory and experiment of interference using air wedge, newtons rings etc. Study the theory of diffraction by fresnels and fraunhoffer methods Study the theories for production of polarization of light Explain different Laser used and make a comparison between them. Apply the gained basic knowledge of laser and working of different type of lasers 		
PHY 404: Electrical Circuits and Network Skills	 After the completion of the course the student will acquire necessary skills/ hands on experience /working knowledge on multimeters, voltmeters, ammeters, electric circuit elements, dc power sources, ac/dc generators, inductors, capacitors, transformers, single phase and three phase motors, interfacing dc/ac motors to control and measure, relays and basics of electrical wiring. Study circuits in a systematic manner suitable for analysis and design. Analyze the electric circuit using network theorems. 		

Semester-V (TY BSc. PHYSICS)

After completion of these courses students should be able to;			
Course	,		
PHY-501:	1)	Apply the concept and knowledge of Mathematical physics to	
Mathematical Physics	,	understand and solve real life problems	
	2)	To understand Gauss divergence theorem, Stoke's theorem,	
	,	Green's 1st and 2nd theorem	
	3)	Know the Cartesian, spherical polar and cylindrical co-ordinate	
	<i>'</i>	systems.	
	4)	Study the singular points of Legendre, Hermite differential	
	,	equation and Funche's theorem	
	5)	Study the Generating functions for Legendre Polynomial Pn(x),	
	,	Hermite polynomial Hn(x), and Bessel functions of first kind	
	6)	To understand the Special Theory of Relativity	
PHY-502: Solid State	1)	To study the different crystal structures and their properties.	
Physics	2)	To understand the Cohesive energy and Bonding in solids	
	3)	To understand the principles and techniques of X-rays diffraction	
	4)	To study the thermal properties of solids.	
	5)	To understand the free electron theory of metals and Band theory	
		of solids	
PHY-503: Atomic and	1)	To understand the physical interpretation of quantum numbers,	
Molecular physics		electron spin and Pauli's exclusion principle.	
2 0	2)	To study the L-S & j-j coupling schemes	
	3)	Study the Zeeman Effect and Paschen Back effect	
	4)	To study the Moseley's law.	
	5)	To study the Raman spectra	
PHY-504 (B):	1)	Apply the concept and use of knowledge of Instrumentation to	
Instrumentation-II		understand and to solve real life problems.	
	2)	To understand the Analog and Digital types instruments	
	3)	Study of Analog and digital transducers	
	4)	To know the AC Bridges	
	5)	To study the Digital to Analog and Analog to Digital converters	
	6)	To study the Display Devices and Recorders	
PHY 505: Solar energy	1)	Apply the concept of use of knowledge of energy resources, solar	
and applications		radiations and conversion to real life problem.	
		Understanding of the course will create scientific temperament.	
	3)	To impart knowledge of basic concepts of solar cell	
		fundamentals.	
	4)	To provide the knowledge and methodology of conversion of	
		solar energy into electricity.	
PHY 506(D):	1)	Study the microcomputer architecture and operations	
Microprocessor-I	2)	To understand the Microprocessor Architecture and function of	
		each block.	
	3)	To Study the addressing mode for 8085	
	4)	To understand the Code conversion programmes	

Semester-VI (TY BSc. PHYSICS)

After completion of these courses students should be able to;		
Course	Outcomes	
PHY 601: Quantum Mechanics	 Formulation of Schrödinger equation-time dependent and time independent forms 	
Wiechanics	2) To understand the Applications and 1-D problems of Schrödinger's equation	
	3) To study the Solutions of Hydrogen atom	
	4) To understand the Commutation and commutative algebra of	
	operators	
PHY 602: Material	1) To gain the knowledge of classification of materials	
Science	2) To study the Organic Materials and polymers	
	3) To study the mechanical, electrical, magnetic and thermal properties of materials	
	4) To understand the Dislocations and Plastic Deformation	
	5) To study the phase diagrams like Unary Phase diagram, Binary Phase Diagram	
PHY 603: Nuclear	1) Know the properties of nucleus and understanding of	
Physics	elementary particles	
	2) To understand the concept of radioactivity and decays law	
	3) To study the Nuclear Models and its achievements, limitations	
	etc.	
	4) To study the theories of nuclear reactions	
	5) To understand the nuclear reactors like swimming pool	
	reactor. O To goin the knowledge of Nuclear Detectors and Appelarators	
PHY 604: Modern and	6) To gain the knowledge of Nuclear Detectors and Accelerators 1) Apply the concept and use of Irray ladge of Medarm and	
	1) Apply the concept and use of knowledge of Modern and	
Applied Physics	Applied Physics to understand and solve the real life problems 2) Apply the knowledge and methodology for solving problems	
	in Physics	
	3) Students would know about the basic principles in the	
	development of modern physics.	
PHY 605: Basic	1) Handle and use various basic mechanical and electrical	
Instrumentation Skills	measuring instruments	
	2) Understanding of the course will create scientific	
	temperament.	
	3) To study the Digital to Analog and Analog to Digital	
	converters	
DITTY (O.C.D.)	4) To study the Display Devices and Recorders	
PHY 606(D):	1) To know the Interfacing with RAMS & ROMS 2) To an about a 1 the Pin discourse of Late 1 8255	
Microprocessor- II	2) To understand the Pin diagram of Intel 8255	
	3) To study the Architecture of Intel-8251 4) To understand the Operations of MODE 0, MODE 1, MODE	
	4) To understand the Operations of MODE 0, MODE 1, MODE 2, MODE 4, and MODE 5	
	2, MODE3, MODE 4 and MODE 5	

Post Graduate (PG)

After successful completion of two year degree program in (M.Sc. PHYSICS) a student should be able to;

Sr. No.	Programme Outcomes (POs)	Program Specific Outcomes (PSOs)
1	1) To promote a culture of research and produce quality human resource in the field of Physics.	1) Students got a professional learning experience through vigorous work that is deliberated with the application of daily life phenomenon.
	2) To teach students a solid foundation of physical, mathematical, and relevant scientific as well as technological knowledge	2) They shared their knowledge by contributing to the local industry society and also be able to integrate in to the international research activities.
	3) To developing the intellectual skills essential for prosperity and success in their careers.	3) They realized a sense of professional responsibility and carrying out such responsibility in line with utmost standards of professional ethics. (developing honesty,
	4) To encourage a culture of research in students and inspire them towards a career of innovation	fairness and dedication during their research work)
	5) To enhance research capabilities by doing a comprehensive literature survey and reading	4) They are able to analyze problems based on physics as well as mathematical principles by utilizing their skills and physics tools.
	advanced texts.	5) They are able to use theoretical knowledge to implement practical solutions

<u>Semester-I (M.Sc. PHYSICS</u>)

After completion of these courses students should be able to;		
Course	Outcomes	
PHY 101: Mathematical Methods for	1) The students will be able to understand and apply the	
Physics	mathematical skills to solve quantitative problems in	
	the study of physics.	
	2) Students will understand the applications of vector	
	space, matrix algebra and special functions.	
	3) Demonstrate a detailed physical and mathematical	
	understanding of a variety of systems and processes	
	in a range of advanced topics in physics	

	4) Demonstrate specialised analytical skills and
	techniques necessary to carry out advanced
	calculations in a range of advanced topics in physics.
	5) Approach and solve new problems in a range of
	advanced topics in physics.
PHY 102: Classical Mechanics	· · · ·
PHY 102: Classical Mechanics	1) The students will be able to apply the Variational principles to real physical problems
	2) Define and understand basic mechanical concepts
	related to advanced problems involving the dynamic
	motion of classical mechanical systems.
	3) Describe and understand the motion of a mechanical
	system using Lagrange, Hamilton formalism.
	4) Describe and understand the motion of the forces in
	non inertial systems.
PHY 103: Quantum Mechanics	1) The students will be able t0 grasp the concepts of
1111 103. Quantum viecnames	
	spin and angular momentum, as well as their quantization and addition rules.
	<u> </u>
	2) Understand historical aspects of development of
	quantum mechanics.
	3) Understand and explain the differences between
	classical and quantum mechanics.
PHY 104: Solid State Physics	1) To provide extended knowledge of principles and
Till 1011 Solid State I hysics	techniques of solid state physics
	2) To provide an understanding of structure, thermal
	and electrical properties of matter
	3) Students have a basic knowledge of crystal systems
	and spatial symmetries.
	4) know the fundamentals of dielectric and ferroelectric
	properties of materials
	5) Students be able to explain superconductivity using
	BCS theory

Semester-II (M.Sc. PHYSICS)

After completion of these courses students should be able to;		
Course	Outcomes	
PHY 201: Statistical Mechanics	1) Students have understood the concept of phase space and its volume.	
	2) They can easily distinguish between different types of particles and statistics and can easily distribute bosons, fermions and classical particles among energy levels.	
	3) After studying Fermi Dirac statistics, students have learnt to deal with much electron system	

	0 771 . 1 . 1111 . 1
	4) The students will be able to work out equations of
	state and thermodynamic potentials for elementary
	systems of particles
PHY 202: Classical Electrodynamics	1) Describe the nature of electromagnetic wave and
·	its propagation through different media and
	interfaces involved in different situations.
	2) Simplify charged particle dynamics and radiation
	from localized time varying electromagnetic
	sources.
	3) To evaluate fields and forces in Electrodynamics
	and Magneto dynamics using basic scientific
	method.
	, 1
	electrodynamics and its applications in branches of
DYNY 202 No. 1 LG 1	Physical Sciences.
PHY 203: Material Science	1) Interpret the phase diagrams of single component,
	multi-component systems
	2) Select appropriate type of material for specific
	properties/application.
PHY 204 (A) : Physics of	1) Students will be able to describe the behavior of
Semiconductor Devices	semiconductor materials
	2) Students will be able to reproduce the I-V
	characteristics of diode/BJT/MOSFET devices
	3) Students will be able to apply standard device
	models to explain/calculate critical internal
	parameters of semiconductor devices
	4) Students will be able to explain the behavior and
	characteristics of power devices such as SCR/UJT
	etc.
	CiC.

<u>Semester-III (M.Sc. PHYSICS</u>)

After completion of these courses students should be able to;		
Course	Outcomes	
PHY 301 Atomic and Molecular	1) To understand the Atomic Spectra and hyperfine	
Physics	structures	
	2) To gain the knowledge of pure rotational spectra,	
	Rotation-vibration spectra, visible and UV spectra	
	3) To understand the Anharmonic oscillator	
	4) To know the parallel and perpendicular bands of	
	linear molecules	
	5) To study the graphical representation and rotational	
	structure of electronic spectra	
	6) To study the Raman effect	
	7) To understand the NMR spectrometer and its	
	applications	

PHY 302 (A) Materials Synthesis	1) To study the Langmuir-Frankel theory of
Methods	condensation
	2) To understand the various techniques of Thin Films
	Depositions
	3) To study the Multiple beam interferometry
	4) To know the Importance of growing single crystals
	and their uses
	5) To understand the electrical properties of thin and
	thick films
PHY 303 (A) Systematic Materials	1) To study the importance of materials
Analysis	characterization
	2) To study the requirements for infrared radiation
	Absorption
	3) To use the Beer's and Lambert's laws
	4) To understand the Structure and Particle size
	determination
	5) To understand the use of electron microscopy
	6) To study the basic principles of Scanning
	Tunneling Microscopy

Semester-IV (M.Sc. PHYSICS)

After completion of these courses students should be able to;		
Course	Outcomes	
PHY 401 Nuclear Physics	1) Know the properties of nucleus likes binding energy, magnetic dipole	
	2) moment and electrical quadrapol moment	
	3) To study the Nuclear Models and nuclear magic numbers	
	4) To understand the n-p, p-p scattering at low and high energy	
	5) To study the Interaction of charged particle and EM radiations with matter	
	6) To study the use of various accelerators and Radiation	
	Detectors	
	7) To understand the basic concept of elementary Particle	
	Physics	
PHY 402 (A) Nanomaterials:	1) To understand the nanomaterials and their necessity	
Synthesis, Properties and	2) To study the various methods for synthesis of	
Applications	Nanomaterials	
	3) To study the Synthesis of SWNT and MWNT and their	
	applications	
	4) To study the Synthesis of metal chalcogenides	
	nanocomposites and their use	
	5) To study the different Characterization techniques of	
	Nanomaterials and their use in different technology.	

PHY 403 (A) Renewable	1) To study Solar Radiation & it"s Measurements.
Energy Sources	2) To understand the Biomass Energy Conversion
	Technologies and their uses
	3) To study the principles and basic components of wind
	mill
	4) To study the various ocean energy conversion
	technologies
	5) To understand the Basics of geothermal electric power
	plant
	6) To know the operation of fuel cell

Ph.D. PHYSICS

Sr.	Programme Outcomes (POs)	Program Specific Outcomes (PSOs)
No.		
1	To encourage a culture of research in students and produce quality human resource in the field of Physics	Students are able to analyze problems based on physics by utilizing their skills and physics tools and also shared their knowledge by contributing to the local industry society
2	To enhance research capabilities and develop the intellectual skills essential for prosperity and success in students career	Students are able to integrate in the international research activities and deliberated with the application of daily life phenomenon.

Department of Chemistry

Under Graduate (UG)

After successful completion of three year degree program in (<u>B.Sc. CHEMISTRY</u>) a student should be able to;

Sr. No.	Programme Outcomes (POs)	Program Specific Outcomes (PSOs)
1	To promote understanding of basic facts and concepts in Chemistry while retaining the excitement of Chemistry.	To develop ability and to acquire the knowledge of terms, facts, concepts, processes techniques and principles of subjects.
2	To make students capable of studying Chemistry in academic and Industrial courses.	To develop ability to apply the knowledge of contents of principles of chemistry.
3	To expose the students to various emerging new areas of Chemistry and apprise them with their prevalent in their future studies and their applications in various spheres of chemical sciences.	To inquire of new knowledge of chemistry and developments therein.
4	To develop problem solving skills in students.	To expose and to develop interest in the fields of chemistry.
5	To expose the students to different processes used in Industries and their applications.	To develop the power of appreciations, the achievements in Chemistry and role in nature and society.
6	To develop proper aptitude towards the subjects.	To develop skills required in chemistry such as the proper handling of apparatus and chemicals.

Course Outcomes

Semester-I (FY BSc. CHEMISTRY)

After completion of these courses students should be able to;		
Course	Outcomes	
CHY-101: Physical and Inorganic	1) To expose & develop interest in the field of	
Chemistry	chemistry.	
	 2) To develop ability & to acquire the knowledge of terms, facts concept processes techniques & principles of subject. 3) To understand the fundamental principle and chemical analysis 	

CHY-102: Organic and Inorganic	1) To develop skills required in chemistry such as the	
Chemistry	proper handling of apparatus & chemical analysis 2) To develop ability to apply the knowledge of contents of principles of chemistry	

Semester-II (FY BSc. CHEMISTRY)

After completion of these courses students should be able to;		
Course	Outcomes	
CHY-201: Physical and Inorganic	1) To develop problem solving skills in students.	
Chemistry	2) To develop proper aptitude towards the subject.	
	3) To develop ability to apply the knowledge of	
	contents of principles of chemistry.	
CHY-202: Organic and Inorganic	1) Determine analyses and evaluate the interpretation	
Chemistry	ships involve in chemistry.	
	2) Develop thirst of chemical knowledge, become flexible and persistence learners and appreciate the need for lifelong learning.	

Semester-III(SY BSc. CHEMISTRY)

After completion of these courses students should be able to;		
Course	Outcomes	
PHY-301: Physical and Inorganic Chemistry	1) Know the qualitative properties of solution, the depression in freezing point, elevation in boiling point and osmotic pressure. Calculate molar and normal solution of various concentrations.	
	2) Explains the application of colligative properties in determining molecular mass.	
	3) Know the qualitative properties of solution, the depression in freezing point, elevation in boiling point and osmotic pressure.	
	4) Compares the general characteristics electronic configuration of lanthanides and actinides, uses of lanthanides and actinides.	
PHY-302: Organic and Inorganic Chemistry	1) This course gives the quantitative ideas about the synthesis, properties and uses of such heterocyclic compounds like pyrole, pyridine qunolene, thiophene, furan etc Different methods for the preparation of important Hetero cycles and their important reactions. Aromaticity, Huckel's rule and its applications	
	2) Explains the different types of structural and stereo isomers CO ₂ Represent organic molecules by Fischer, Flying wedge, Sawhorse and Newman projection formulas, Conformational isomerism of	

	ethane, n-butane, cyclohexane, Conformational analysis of 1,4 cis and trans disubstituted cyclohexane. 3) Explains the theories of acids and bases. Different solvents and solubility. Hard and soft acids and bases: definitions, Pearson HSAB concept, theories of Hardness and softness, application and limitation of HSAB concepts
CH-304 Basic Analytical Chemistry	1) Develops accuracy and precision in doing experiments, understands the different errors and methods for minimizing errors. Explanation of MSDS. Explain significant figures, absolute error, relative error, mean, median, Give the theory behind the qualitative and quantitative analysis conducted in the laboratory. Study the importance of safety and security, responsibility types of hazards and risk in chemical laboratory. Understand the use of personal protective and other safety equipments, handling of chemical in laboratory.
	 2) Understand the route of explores for toxic chemicals. Learn good laboratory practices and its applications. 3) Students are enabling to aware about PH, POH, derivation of Henderson's equation, Conduct acid base titrations, Different
	 indicators used in titrations, 4) complex metric titrations, Applications of titrations 5) Students are Enable to aware about Classification of chromatography, Mobile phase and stationary phase, Study the instrumentation, sample injection system, columns for HPLC and GC, Solvent treatment system and choice of mobile phase. To give an extended knowledge about chromatographic
CH-303 Chemistry Practical	 Determine the miscibility temperature of phenol—water system Experimental demonstration of Conductometric and Potentiometric titrations of strong acid against strong base, weak acid against strong base. Simple Organic and Inorganic derivatives preparations

Semester-IV(SY BSc. CHEMISTRY)

After completion of these courses students should be able to;	
Course Outcomes	
PHY-401: Physical and Inorganic Chemistry	1) Free energy and equilibrium, Gibbs and Helmholtz energies, spontaneous and non spontaneous reactions, changes in enthalpy, Entropy and free energy of reactions, Derivations of Clauses and Celsius chaperon equations.
	 Electrochemistry discussed electrical properties of ionic solutions. Different types of cells and their formulations, applications. Solve the cell reactions and calculate cell EMF. Double salts and coordination compounds, coordination complexes and complex ions, coordination number, Unidentate, bidentate and polydentate ligands, chelating ligand and chelates, physical methods used in study of complex, Nomenclature of coordination compounds.
	4) Therotical knowledge about matals, non metals and semiconductors. Understand the p-type semiconductor and n-type semiconductor. Their preparations and uses.
PHY-402: Organic and Inorganic Chemistry	1) Synthesis of organic reaction is itself involves a large part of organic chemistry. This is called synthetic organic chemistry. This chapter involves different synthetic reagents for synthesis of malonic ester and Acetoacetic ester.
	2) Organometallic compounds are very important in biological bodies like haemoglobin,
	3) chlorophylls, Vitamin B ₁₂ and also they can be used as chemical reagent. This course discussed about the synthesis and properties of these organometallics of Zinc, Magnessium, Lithium and Copper.
	4) to understand deferent theories like MOT, VBT, CFT, LCAO, Compare MO and VB theory, Know the meaning of various terms involved in coordination Chemistry ,To understand Werner's formulation of complexes and identify the types of

	valences, Know the limitations of VBT, Know the shapes of d-orbitals and degeneracy of d-orbitals, Explain MO Theory and draw the MO diagrams for H ₂ , He ₂ , B ₂ , N ₂ , O ₂ , CO and NO	
CH-403 Chemistry Practical	1) Experiments based on Gravimetric and Colorimetric analysis.	
	2) Gravimetric estimation of Barium, Sulphate, Calcium using silica crucible	
	3) Organic qualitative analysis in small quantity helps in type determination and reducing the consumption of chemicals.	
	4) Determine the physical constants like boiling point and melting point of organic compounds.	
	5) Recrystallisation of organic compounds from alcohol and water.	
	6) Identify the organic compounds.	
	7) Paper chromatography.	

Semester-V (TY BSc. CHEMISTRY)

After completion of these courses students should be able to;		
Course	Outcomes	
CH-501: Principles of Physical	1) To orient and acquaint the students towards the basic	
Chemistry-I	concepts of Quantum Chemistry	
	2) To acquire knowledge about rates of chemical reactions	
	and distinguishing the reaction of different order and their	
	characteristics.	
	3) To understand the basic principles of phase rules and	
	phase diagrams.	
	4) To learn the underlying principles of electrode reactions,	
	electrochemical cells and applications of EMF.	
CH-502: Inorganic Chemistry	1) To describe the VSEPR theory to predict shape of	
	molecules from electron pairs.	
	2) To describe the bonding in simple compounds using VBT.	
	3) To describe the principles of VBT to predict hybridization	
	of orbitals.	
	4) To understand how CFT explains electronic structure,	
	colour and magnetic properties of co-ordination	
	compounds.	
	5) To introduce the basic principles of MOT and electronic	
	geometry of molecules.	
	geometry of motorates.	

CH-503 - Organic Reaction Mechanism	 To study different types of organic reactions. To understand the mechanisms of different types of reactions. To distinguish between types of substrates and types of reagents. To understand ways of attack of reagent, breaking and formation of bonds in different reaction mechanisms. To study kinetics, evidences and factors affecting different types of reactions. To study stereochemistry of different reactions. To understand role of different reagents in different reactions 	
CH-504 Industrial Chemistry	 a. Student will understand basic requirements of Chemical Industry, different terms, operations and processes involved in chemical Industry. Describe Copy Right Act, Patent Act and Trade Marks, Bureau of Indian Standards (BIS) and International Organization for Standardization (ISO). Basic requirements, raw materials, different processes and operations involved in Sugar Industry and also different grades of sugar and uses of by-products of sugar industry. Importance of fermented products, basic requirements, theory and process of alcohol making, fractional distillation and various terms involved in Fermentation Industry. Understand Occurrence of Petroleum, theories of formation of Petroleum and different terms Viz. Knocking, Anti-Knock Compounds, Octane number, Cetane number, Gasohol and Power alcohol etc. Manufacturing processes involved in Industrial Organic Synthesis such as Methanol, Isopropanol, Glycerol, Acetylene and Aromatic hydrocarboni.e. Toluene from petroleum with their uses 	
CH-505 - Analytical Instrumentation CH-506(A):Bio-Chemistry	 To develop an understanding of the range and uses of analytical methods in chemistry. To understand and establish the role of chemistry in quantitative analysis. To enhance the Analytical instrumental skill of the students. Students will study biomolecule like carbohydrates, amino acids, proteins, enzymes, lipids and nucleic acids. Students will understand definitions, classifications and examples of these biomolecule. Students will learn the detailed structure of these biomolecule along with types of bonds or linkages present in their molecules. 	

4) Students will learn the chemical properties of these
biomolecule and the action of some reagents on them in
the form of reactions or graphical presentation.
5) Students will understand biochemical energetic of common
energy rich compounds along with hydrolytic reactions.
6) Students will learn metabolisms like Glycolysis, TCA
cycle,
7) Transamination, deamination and β - oxidation through
reactions, enzymes involved, outlines and energetic.

Semester-VI(TY BSc. CHEMISTRY)

After con	After completion of these courses students should be able to;	
Course	Outcomes	
PHY-601: Principles of Physical Chemistry-II	 To learn the basics of molecular spectroscopy and rotational spectra. To understand the basic principles and applications of nuclear chemistry. To learn the consequences of light absorption by atoms and molecules and photochemical reactions. To learn the laws of crystallography and basics of crystal structure 	
PHY-602: Inorganic Chemistry	 Learn about basic principles and synthesis of nanomaterials. Learn about classification, composition and processing of cement. Learn about classification and composition of alloys. Learn about types manufacture and applications of fertilizers 	
CH-603 Spectroscopic Methods of Structure Determination	 To study principle of spectroscopy and to understand wave parameters and terms involved in spectroscopy. To study different types of spectroscopy. To understand principle, concept and the terms used in each type of spectroscopy. Interpretation of UV, IR, NMR spectra. Use of spectral data for determination of structure of unknown organic compounds. To study different applications of each type of spectroscopy. 	
CH-604 Chemistry of industrial Important Product	The student will be able to understand 1) Describe the industrial production of a number of important organic and inorganic compounds / chemicals and products of end use. 2) Gain comprehensive knowledge of cutting-edge developments in a field of different chemical industries. 3) Importance of Cosmetics Industry and a general study including preparation and uses of the Hair dye, hair spray,	

	shampoo, suntan lotions, lipsticks, talcum powder, nail	
	enamel, creams (cold, and shaving creams).	
	4) Perfumes and identify the distinguishing features of its	
	components and also an essential oils and their importance in	
	cosmetic industries with reference to Eugenol, Geraniol,	
	sandalwood oil, eucalyptus, rose oil, 2- phenyl ethyl alcohol,	
	Jasmone, Civetone, Muscone etc.	
	5) Know about pesticides both natural and synthetic, benefits and	
	adverse effects of it, also synthesis, manufacture and uses of	
	pesticides viz. Organochlorines (DDT, Gammexene,);	
	Organophosphates (Malathion, Parathion); Anilides (Alachlor	
	and Butachlor).	
	6) Definition, classification, raw material used in soaps and	
	detergents, reaction involved in it, Manufacture of Soaps and	
	cleansing action of soaps and detergents.	
	7) Definition, properties of good dyes, relation between colour	
	and constitution, classification of dyes according to their	
	mode of application and chemical constitution.	
	8) Importance's, definition and meaning of the different terms	
	involved in Drugs and Pharmaceuticals Industry and also	
	synthesis, uses, properties and industrial manufacture of Paracetamol, Aspirin, and Chloramphenicol.	
	raracetamor, Aspirm, and Chioramphemeor.	
CH-605 Analytical	1) To provide knowledge of instruments which are used in	
Techniques	Chemical, Pharma, Petroleum, and insecticide and pesticide	
	industry	
	2) To increase student technical skill as per industry need.	
	3) To develop an understanding of the range and uses of analytical methods in chemistry.	
CH-606(A): Polymer	analytical methods in chemistry.1) Define terms like monomer, polymer, polymerization,	
Chemistry	polydispersity index, etc., classify polymers based on their	
	origin, native backbone chain, and thermal response.	
	2) Know glass transition temperature and its determination,	
	various ways to express molecular weights of polymers and	
	polydispersity index.	
	3) Identify different mechanisms of polymerizations viz. Free	
	radical, ionic, and condensation polymerizations. 4) Distinguish techniques of polymerization based on physical	
	conditions required for the preparation of polymers in	
	laboratory or industry.	
	5) Familiar with preparation, properties, and applications of	
	industrially important selected polymers.	

Post Graduate (PG)

After successful completion of two year degree program in (M.Sc. CHEMISTRY) a student should be able to;

Sr. No.	Programme Outcomes (POs)	Program Specific Outcomes (PSOs)
	 Demonstrate and apply the fundamental knowledge of the basic principles in various fields of Chemistry Create awareness and sense of responsibilities towards environment and apply knowledge to solve the issues related to Environmental pollution. Apply knowledge to build up small scale industry for developing endogenous product. Apply various aspects of chemistry in natural products isolations, pharmaceuticals, dyes, textiles, polymers, petroleum products, forensic etc. and also to develop interdisciplinary approach of the subject. 	 Have developed their critical reasoning, judgment and communication skills. Augment the recent developments in the field of green and ecofriendly reactions, pharmaceutical, Bioinorganic Chemistry and relevant fields of research and development. Enhance the scientific temper among the students so as to develop a research culture and implementation of the policies to tackle the burning issues at global and local level.

Semester-I (M.Sc. CHEMISTRY)

After completion of these courses students should be able to;		
Course	Outcomes	
CH-110	 Represent of the rate law of the elementary and chain reaction. Understand of the theories for the determination of the rate of the reactions. Understand of the kinetics of the explosive photochemical and unimolecular reactions. Understand of the laws of thermodynamics and their applications. Know the phase diagram of single component systems and binary mixtures. Understand of the applications statistical thermodynamics. Understand of the quantum chemistry of free electron and H- atom 	
CH-130 Inorganic Chemistry	Able to visualize in 3-D understand the concept of symmetry element and symmetry operation.	

	Stability of organometallic compound and cluster and application as industrial catalyst.
CH-150 Basic Organic Chemistry	 Know and recall the fundamental principles of organic chemistry that include chemical bonding, nomenclature, structural isomerism, stereochemistry, chemical reactions and mechanism. Justify a reasonable mechanism for a chemical reaction.

Semester-II(M.Sc. CHEMISTRY)

After completion of these courses students should be able to;		
Course	Outcomes	
CH-210	 Understand of the principle of Microwave, IR, Raman, Electronic, NMR, ESR and Mossbauer spectroscopy Draw of the schematic Microwave, IR and Raman spectrum of di and triatomic molecules based on the selection rules. Understand of decay kinetics and measurement of radioactivity Get knowledge of types of nuclear reactors Study the applications of radioactivity, Understand Radiolysis and radicals 	
CH-230	 Catalytic reaction involving organometallic compound and mechanism of these reaction Determing the term symbol of Transition element and orgel diagram 	
CH-250	 Understand various reactions and rearrangements. Understand and write mechanism of reactions and their applications. Understand how to convert one molecule into another by using oxidising and reducing, reagents. Apply theoretical knowledge in practicals for various conversions. 	
CH-290	 Understand the Principles of mass spectroscopy, gas chromatography and HPLC. Apply the techniques for structure determination of organic molecules. Perform statistical analysis of chemical data by developing analytical mind 	
CH-P-1 Physical Chemistry Practical	After successfully completing this course, students will be able to:	

_	
	 Prepare the solution of the desired concentration and the desired volume.
	• Know the principle and handling of pH meter, Potentiometer, conductivitymeter, colorimeter,
	viscometer,etc.
	 Plot accurate graphs of the desired scale for the calculations
	 Maintain laboratory ethics, safety and cleanliness Understand waste management of the laboratory
CH-O-1 Organic Chemistry Practical	After successfully completing this course, students will
,	be able to:
	Understand different purification techniques in
	organic chemistry like recrystallization,
	distillation, steam distillation and extraction.
	Get awareness of safety techniques and handling
	of chemicals
CH-I-1 Inorganic Chemistry Practical	After successfully completing this course, students will
·	be able to:
	• Prepare the exact solutions for quantitative analysis.
	Apply the knowledge of quantitative analysis for the determination of metals from ores/alloys.
	Synthesize Inorganic complexes and also find
	their purity.
	Understand Ion-exchange chromatography for
	separation of metal ions.
	Understand the principle and working of different
	instruments like colourimeter, conductometer,
	spectrophotometer, etc.

Semester-III(M.Sc. CHEMISTRY)

After completion of these courses students should be able to;	
Course	Outcomes
CH-350: Organic Reaction Mechanism	 Students will study Electro negativity and inductive effect, resonance, bond strength, electrostatic effects, hybridization, aromaticity and solvation. Students will able to make comparison of acidity and basicity of organic compounds on the basis of pKa values,. Students will learn the Organic reactive intermediates and their structure, methods of generation, structure, stability and important reactions involving carbocations, nitrenes, carbenes, arynes. Students will learn the neighboring group mechanism, neighboring group participation by π and σ bonds,

CH-351: Spectroscopic Methods in Structure Determination	 anchimeric assistanceStudents will understand biochemical energetic of common energy rich compounds along with hydrolytic reactions. Students will learn Classification, nomenclature and study of all eight mechanisms of acid and base catalyzed hydrolysis with suitable examples. On successfully completing the module students will be able to: Demonstrate a good understanding of the electromagnetic spectrum and how this can be applied to the study of chemical molecules.
	 Describe the principles of spectroscopic methods such as NMR, IR and UV-Vis. Demonstrate knowledge of the principles of mass spectrometry.
	 Predict number of signals, splitting patterns in the proton NMR of a compound given its structure and use this knowledge to interpret NMR spectra of simple molecules. Identify the absorption frequencies of major functional groups, understand the factors that govern electronic absorption and use this knowledge to interpret IR and UV-Vis spectra of simple organic molecules. Develop ability in the combined use of mass spectrometry and spectroscopic techniques for structure elucidation.
CH-352: Organic Stereochemistry	 Understand various terminologies in stereochemistry. Will be able to draw the stereochemical structures of different molecules. Understand the isolation of racemic mixtures. Draw various organic reactive intermediates with stereochemistry.
CH-353: Free radical, photochemistry, Pericyclic reaction and their applications	 Student able to predict the stereochemistry & products of the Pericyclic reactions To develop interest and understanding of the theoretical basis for Pericyclic reactions and skills for the utilization of these reactions in the organic synthesis. Student able to identify different type of pericyclic reaction understand and write mechanism of reactions and their applications. Describe fundamental photochemical and radiation chemical processes both qualitatively and quantitatively, describe the properties and reactivity of radicals and how these are connected to the structure of radicals as well as account for the importance of radicals in industrial processes and in biological systems.

Semester-IV(M.Sc. CHEMISTRY)

After completion of these courses students should be able to;		
Course	Outcomes	
CH-450: Chemistry of Natural Products CH-451: Synthetic Methods in	 provide an overview of the field of natural product chemistry. identify different types of natural products, their occurrence, structure, biosynthesis and properties. discuss the use of natural products as starting materials for medicines. Understand that some minerals are essential components of important molecules such as hormones and enzymes. Be able to describe the basic properties of enzymes. 	
CH-451: Synthetic Methods in Organic Chemistry	 Able to know about the role of Organo metallic compounds in the synthesis of organic compounds. Gain knowledge on usage of different Protecting groups. Able to write mechanisms of the reactions of various synthetic reagents and their structures. 	
CH-452: Heterocyclic Chemistry, Chiron Approach and Medicinal Chemistry	 After successfully completing this course, students will be able to: Understand the stereochemistry of carbohydrates and their reactions. Understand the concept of chiral templates and chiral drugs Understand the synthesis of various drugs. Understand the mode of action of different anti-fungal, anti-bacterial and anti-viral drugs understand how to synthesize five, six and sevenmembered heterocycles. utilize their knowledge in practicals for various heterocyclic and photochemical conversions. 	
CH -O-2: Ternary mixture separation (Annual) Practical CH -O-3: Three stage	After successfully completing this course students will know, • How to separate three components • How to purify organic compounds in small scale After successfully completing this course students will know,	
preparations (Annual)	 How to synthesize organic molecules. How to perform reaction in small scale How to maintain reaction conditions. How to follow reaction by using thin layer chromatography 	
CH -O-4: Short Research Project (Annual)	 To design research oriented project on particular context. To identify the topic with the consideration feasibility. To search literature on selected research oriented project work. To identify/search the advances in current research. 	

•	To conduct e	xperiment	scientifically	with safety.
---	--------------	-----------	----------------	--------------

- To utilize the techniques learn earlier for the synthesis of bioactive molecules with the help of named reactions and rearrangements.
- To characterize the prepared molecules by physical and spectral analysis like IR, ¹H NMR, ¹³C NMR and Mass Spectroscopy.

Ph.D. CHEMISTRY

Sr. No.	Programme Outcomes (POs)	Program Specific Outcomes (PSOs)
1	To provide the best education and career opportunity for all students including those from the underrepresented minority groups with the best cultural and nurturing environment conducive to learning and scholarly activities.	In-depth knowledge in one main chemistry field with sufficient background in two related fields through advanced course work and laboratory research.
2	To prepare students for development of methods of independent and systematic investigations leading to scientific σ discoveries.	Carry out independent chemistry research with competency in research design, data gathering and interpretation, and communication of research results through scientific publications and presentations
3	To prepare students for a successful career at academic institutions, industrial and business entities, and governmental agencies.	Competitive professional employment in academia, industry, consulting, government, and teaching at the college level
4	To promote professional development and growth of the faculty.	Understanding and awareness of professional, ethical and safety applications of their knowledge.

Department of Botany

Under Graduate (UG)

After successful completion of three year degree program in (<u>B.Sc. Botany</u>) a student should be able to;		
Programme Outcomes	 To study the Lower and higher cryptogamic plants. To study the diversity and economical importance of Angiosperms and Gymnosperms plant groups. To study Plant Physiology, Metabolism, Anatomy, Embryology and Ecology. To study techniques of Horticulture, Floriculture, Plant Breeding etc. 	
Programs Specific Outcome	 To study diversity, habit, habitat and life cycle patterns of Virus, Bacteria, Fungi, Algae, Bryophytes and Pteridophytes plant groups. To study the Angiosperms and Gymnosperms plant upto Class, Order, Family, Genus and Species and economical importance each family. To study the Physiological processes, internal structure, embryo and endosperm and ecological factors of plants. To understand Horticulture practices, techniques commercial Floriculture and Plant breeding. 	

Course Outcomes

Semester-I (FY BSc. BOTANY)

After completion of these courses students should be able to;		
Course	Outcomes	
BOT-101: Microbial Diversity, Algae	1) Student studied the diversity among the microbes.	
& Fungi	2) Students had known the systematic morphology and structures of bacteria, viruses' algae and fungi.	
BOT-102: Plant Taxonomy	 Student studied the diversity among angiosperms. To understand the economic importance of the angiospermic plants. 	

Semester-II (FY BSc. BOTANY)

After completion of these courses students should be able to;		
Course	Outcomes	
BOT-201: Diversity of Archegoniates	1) To studied the Silent features of Archegoniates	
	2) Student makes aware about higher cryptogams and	
	Gymnosperms.	
BOT-202: Plant Ecology	1) Students aware about the conservation about	
	biodiversity.	
	2) To study the botanical regions of India and types of	
	vegetation in Maharashtra.	

Semester-III(SY BSc. BOTANY)

After completion of these courses students should be able to;		
Course	Outcomes	
BOT-301: Plant Anatomy	1) To known the scope and importance of Plant	
	Anatomy.	
	2) To study various tissue system.	
BOT-302: Plant Physiology	1) To known the importance and scope of Plant	
ţ St	Physiology.	
	2) To study the different processes in relation with	
	structure of organism and its environment.	

Semester-IV(SY BSc. BOTANY)

After completion of these courses students should be able to;		
Course	Outcomes	
BOT-401: Plant Embryology	1) To known the scope and importance of Embryology.	
	2) To Study the Pollination, Fertilization Endosperm	
	and Embryogeny.	
BOT-402: Plant Metabolism	1) To study the scope and importance of plant	
	metabolism.	
	2) To known the process of Photosynthesis in higher	
	plants, C3, C4 and CAM pathway.	

Semester-V (TY BSc. BOTANY)

After completion of these courses students should be able to;	
Course	Outcomes
BOT-501: Lower Cryptogams	 To study salient features of cryptogamic plants. To make students aware about the status of cryptogams as a group in plant kingdom.
BOT-502: Morphology and Systematics of Angiosperms	 To study vegetative and floral morphology of angiospermic plants. To study the status of angiosperm in plant kingdom.

BOT-503: Cell Biology and Genetics	1) To study the Prokaryotic and eukaryotic cell.	
	2) To study the cell components and their functions.	
BOT-504: Plant Physiology and	1) To study the growth pattern of plant.	
Biochemistry	2) To know the phenomenon of	
	photoperiodism and effect of	
	phytochrome on flowering.	
BOT-505: Biofertilizers	1) To introduce application of Biofertilizer technology	
	in Agriculture.	
	2) To familiarize students with microbes used as	
	biofertilizers.	
BOT-506: Horticulture	1) To know horticulture, its scope, disciplines and	
	importance.	
	2) To understand different horticultural practices and	
	their methods.	

Semester-VI (TYBSc. BOTANY)

After completion of these courses students should be able to;		
Course	Course Outcomes	
BOT-601: Higher Cryptogams	1) To study salient features of cryptogamic plants.	
	2) To make students aware of the status of cryptogams	
	as a group in plant kingdom.	
BOT-602: Gymnosperms and	1) To study Gymnosperms with respect to	
Paleobotany	distinguishing characters, comparison with	
	Angiosperms, and classification.	
	2) To study the life cycles of Pinus and Gnetum.	
BOT-603: Molecular Biology	1) To study molecular biology in relation to genetic	
	material, its inheritance, modification, replication.	
	2) To study the mitochondria and chloroplast DNA.	
BOT-604: Economic Botany	1) To know useful bio resources of prime importance to	
	mankind.	
	2) To acknowledge students about various groups of	
	plants of the world as well of India.	
BOT-605: Floriculture	1) To know floriculture, its scope and importance.	
	2) 2) To know the commercial floriculture.	
BOT-606B: Plant Breeding	1) To introduce the student with science of plant	
	breeding.	
	2) To introduce student with branch of Plant Breeding	
	for survival of human being from Starvation	

Department of Zoology

Under Graduate (UG)

After successful completion of three year degree program in (**B.Sc. ZOOLOGY**) a student should be able to:

Sr. No.	Programme Outcomes (POs)	Program Specific Outcomes (PSOs)
1	Possess a good command of fundamentals in Zoology and its relationship to other disciplines.	Achieve excellence in academic and scientific research in the field of Zoology.
2	Know the theories and scientific facts in the sections of Zoology and interrelations among organisms and their biosphere	Develop and implement ways and means to ensure quality performance and outputs of Zoology program.
3	Memorize the concepts of laboratory management, organization and evaluation.	Use modern technology in education and scientific research in Zoology.
4	Recognize the management and concepts of bio-systems, organization and evaluation.	Implement advanced training to improve the skills of graduates in Zoology and related fields.
5	Outline the policy and legislation of animal Science and ethics.	Create academic and scientific environment to attract outstanding faculty, researchers and students.
6	Design and conduct experiments in Zoology	Improve the national and international partnerships with academic institutions and research centers.
7	Communicate effectively through writing reports, giving presentations, and participating in discussions.	Amelioration in presentation skill with specific purpose
8	Demonstrate skill in the usage of computers, networks, and software packages relevant to Zoology	Object orientated computer skill.

Course Outcomes

Semester-I (FY BSc. ZOOLOGY)

After completion of these courses students should be able to:	
Course	Outcomes
ZOO 101 Animal Diversity I	 Understand classification of protista. Study General characters and classification up to classes. Describe and classify phylum Platyhelminthes and identify the problems caused by parasitic forms Understand the anatomical features of non- chordates through type study of Phylum Arthropoda
ZOO 102 Animal Diversity II	 Describe and classify branch Pisces, with examples and salient features Study the Generate an understanding about phyla. Classify mammals and interpret general evolutionary relationships among and between these animal groups
ZOO 103 Practical Animal Diversity I & II	 Observe morphological structure of animal. Identify differentiae animal in animal diversity.

Semester-II (FY BSc. ZOOLOGY)

After completion of these courses students should be able to:	
Course	Outcomes
ZOO 201 Comparative Anatomy of Vertebrates	 Understand Derivatives of integument w.r.t. glands and digital tips. Describe comparative anatomy of Vertebrates. Discuss Brief account of alimentary canal and digestive glands. Identify Types of receptors.
ZOO 202 Developmental Biology of Vertebrates	 Describe Early Embryonic Development. Differ Fundamental processes in development Explain in brief Types of placenta on the basis of histology Understand Developmental biology of Vertebrates.
ZOO 203 Practical Comparative Anatomy & Developmental Biology of Vertebrates	 Observe comparative anatomy of animal. Identify differentiae animal in vertebrates. Describe Developmental Biology of Vertebrates

Semester-III (SY BSc. ZOOLOGY)

After completion of the	After completion of these courses students should be able to;	
Course	Outcomes	
ZOO 301	1) Understand Structure of a neuron.	
Physiology	2) Understand about Absorption of carbohydrates, proteins, lipids.	
	3) Describe Respiratory volumes and capacities.	
	4) Acquire knowledge regarding Structure of Heart and Endocrine	
	glands	
ZOO 302	1) Describe Biosynthesis and β oxidation of palmitic acid.	
Biochemistry	2) Understand Classification of Enzymes	
	3) Develop knowledge of Enzyme Kinetics.	
ZOO 303	1) Understand Preparation of hemin and hemochromogens	
Physiology &	2) Understand about Estimation of total protein in given solutions by	
Biochemistry	Lowry's method	
	3) Describe Study of permanent slides of spinal cord, duodenum,	
	liver, lung, kidney, bone, cartilage	
SEC I	1) Understand Classification and Biology of Honey Bees	
Apiculture	2) Acquire knowledge regarding Describe Artificial Bee rearing	
	3) Develop knowledge about Products of Apiculture Industry and its	
	Uses	
	4) Understand about Modern Methods in employing artificial	
	Beehives for cross pollination in horticultural gardens	

Semester-IV (SY BSc. ZOOLOGY)

After completion of these courses students should be able to:	
Course	Outcomes
ZOO 401	1) Understand about Mendel's work on transmission of traits
Genetics	2) Understand Chromosome theory of inheritance
	3) Describe definition of gene mapping& mutation
	4) Students become familiar with Chromosomal mechanisms and
	methods
ZOO 402	1) Understand about Major Events in History of Life
Evolutionary Biology	2) Describe Types of natural selection
	3) Acquire knowledge regarding Biological species concept
ZOO 403	1) Describe Study of Linkage, recombination, gene mapping
Genetics &	using the data
Evolutionary Biology	2) Understand about Study of homology and analogy from
	suitable specimens/ pictures
	3) Students become familiar with Study of Mendelian Inheritance
	and gene interactions
SEC II	1) Describe Preparation of blood smear and Differential
Medical Diagnostics	Leucocyte Count.
	2) Develop knowledge about prevention of Diabetes
	3) Understand about Diagnostic Methods Used for Urine Analysis

Semester-V (TY BSc. ZOOLOGY)

After completion of these courses students should be able to;		
Course	Outcomes	
ZOO-501:Reproductive	1) Understand about modern contraceptive devices.	
Endocrinology	2) Describe the diversity in form, structure and habits of invertebrates and vertebrates	
	3) Explain the reproductive patterns in animal world	
ZOO-502: Cell and	1) Explain the fine structure and functions of cell organelles.	
Molecular Biology	2) Understand the tools in molecular biology and its implications in human welfare.	
Zoo 503: Mammalian	1) Ddistinguish tissues with their structural details with functions.	
Histology	2) Understand tissues and their systems.	
	3) Develop deeper understanding of life is and how it functions at cellular level as well as histological structure of tissues.	
Zoo 504: Animal Biotechnology	1) Students become familiar with genetically engineered products for human animal welfare.	
	2) Understand applications of animal biotechnology.	
Zoo 505: Public health and	1) Understand the need of maintenance of personal and public	
hygiene (Skill Based)	hygiene. 2) Acquire knowledge regarding epidemiology, prevention.	
Zoo 506 : (Elective Course – any one)	1) Understand Crop loss due to their dominance.	
A) Pest management	2) Develop personal skills on maintenance of aquarium.	
B) Aquarium Fish Keeping	3) Aware of Aquarium as commercial, decorative and of scientific studies.	

Semester-VI (TY BSc. ZOOLOGY)

After completion of these courses students should be able to;		
Course	Outcomes	
Zoo 601: Study of Leech and Calotes	1) Understand the systematic position, habit and habitat of Leech and Calottes.	
	2) Understand taxonomic status of Leech as invertebrates and Calottes as vertebrates	
Zoo 602: Chick Embryology	 Study the various stages involved in the developing embryo including chick. Know the processes involved in embryonic development and practical applications of studying the chick embryology. 	

Zoo 603 : Applied Zoology	1) Acquire basic knowledge and skills in applied branches of zoology
	2) Equip the students with self-employment capabilities.
	3) Provide scientific knowledge of profitable farming.
	4) Get technical skill of vermicomposting.
	5) Learn about all aspects of raising poultry for their meat and
	eggs.
	6) Know the economics, problems and prospects of Vermi
	composting and Poultry.
Zoo 604: Microtechnique	1) Understand the process of preparing permanent slides of preserve
	tissue
	2) Prepare the whole mounts microscopic slides and staining
7. (0.5)	reactions.
Zoo 605:	1) Understand some basic concepts of research and its
Research Methodology (Skill Based)	methodologies.
(Skiii Daseu)	2) Select and define appropriate research problem and parameters
	including data collection and its analysis.
	3) Describing various types of Sampling
	4) Understand the Writing of dissertations, project proposals, project reports, research papers.
	5) Inculcate the research attitude with details of research and
	publication, presentation.
Zoo 606 : Elective Course	1) Get introduced to the basic concepts of
A) Bioinformatics	Bioinformatics and its significance
11) Didinior mucies	2) Explain generation and different types of computers with basic
	programming languages.
	3) Overview about types of Biological data and database search
	tools.
	4) Get exposed to computational methods, tools and algorithms
	employed for proteomics and genomics
	5) Develop an expert manpower to handle the own sericulture
7 (0) FI (C	units.
Zoo 606 : Elective Course	1) Give scientific knowledge about mulberry cultivation, silkworm
D) Comionitums	rearing techniques to the students. 2) Train the students in compressive silk production techniques
B) Sericulture	2) Train the students in compressive silk production techniques.

Post Graduate (PG) M.Sc. ZOOLOGY

After successful completion of two year degree program in (M.Sc. ZOOLOGY) a student should be able to;

Sr. No.	Programme Outcomes (POs)	Program Specific Outcomes (PSOs)
1	Memorize the concepts of laboratory management, organization and evaluation.	Postgraduate will have significant opportunities in various service domains at national and international level, and can work as scientist, analyst, quality controller, academics, research organizations and set testing labs.
2	Apply knowledge of zoology to become competent teacher at local and national level	Postgraduate will continuous learner to learn and adopt new skills and techniques to overcome the problem related with new technologies.
3	Adopt scientific concepts relating to environmental usage and sustainable development.	Achieve excellence in academic and scientific research in the field of Zoology.
4	Know the theories and scientific facts in the sections of Zoology and interrelations among organisms and their biosphere	Develop and implement ways and means to ensure quality performance and outputs of Zoology program.
5	Design and conduct experiments in Zoology	Improve the national and international partnerships with academic institutions and research centers.

Semester-I (M.Sc. ZOOLOGY)

After completion of these courses students should be able to;	
Course	Outcomes
ZOO 101 Structure and Function	1) Study the Organization and life
of Invertebrates	2) Describe Locomotory organelles
	3) Ability to explain Nutrition and Digestion
	4) Overview about Respiratory pigments in invertebrates
ZOO 102 Cell and Developmental	1) Study the Structure and function of Plasma Membrane
Biology	2) Understand the Signaling molecules.
	3) Describe Basic concepts of development.
	4) Overview about Differentiation of neurons.
ZOO 103 Quantitative Biology	1) Describe Graphical representation of grouped data - Bar
	diagram, Histogram, Pi diagram, frequency polygon,
	Ogive curves.

	2) Study the Correlation and Regression
	3) Explain Analysis of variance
ZOO 104 Practical	1) Overview about Dissection of Grasshopper/Cockroach so
Practical corresponding to ZOO	as to expose its
101 & ZOO 102 CB	2) Become skilled in Classification of Invertebrates -
	Porifera to Annelida up to order
ZOO 105 Practical	1) Understand the process of Detection of carbohydrates by
Practicals corresponding to ZOO	PAS reaction
102 DB & ZOO 103	2) Detection of Mitochondria by Janus green method
	3) Develop an Computation of Standard Deviation

Semester-II (M.Sc. ZOOLOGY)

After completion of these courses students should be able to;	
Course	Outcomes
ZOO 201: Structure and function of Vertebrates	 Describe Organization of Protochordates Origin and evolution of Amphibia
01 / 01 00 01 00 01	3) Study of endoskeleton of human
ZOO 202 Biochemistry and	1) Chemistry of biomolecules and their significance
Enzymology	2) Overview about Protein structure
· Si	3) Describe Enzyme activity
ZOO 203 Tools and Techniques	1) Describe Principle, parts and its applications of
for Biology	Microscopic techniques.
	2) Study of Cell culture techniques
	3) Understand the Separation techniques in biology
ZOO 204 Practical	1) Develop an Classification of Pisces (Fishes) up to orders -
Practicals corresponding to Zoo:	Elasmobranchii, Ostiechthyes, Teleostomi and Dipnoi.
201 & Zoo: 202	Overview about Study of Appendicular and Axial skeleton of human
	3) Study of eye ball muscles of Dog fish/ Pecten from eye ball of hen.
	4) Understand the process of Estimation of Vit. 'C' from suitable source
	5) Develop an Preparation of buffer of known molarity and
ZOO 205 Practical	pH. 1) Overview about Preparation of tissue homogenate and
Practicals corresponding to ZOO	fractionation of liver cell components
202 & ZOO 203	2) Describe Study of Compound and Phase Contrast microscopy.

<u>Semester-III (M.Sc. ZOOLOGY)</u>

After completion of these courses students should be able to;		
Course		Outcomes
ZOO 301 (B)	1)	Describe the Branches of physiology
Animal Physiology – I	2)	Understand Classification of Animals Based on Thermoregulation
	3)	Explain Thermoregulation in Camel
	4)	study of Functions of Circulatory system in Vertebrates
ZOO 302 Immunology and	1)	Development of different cell types of the immune system
Molecular Biology	2)	Understand Principles of generation of immunoglobulins
	3)	Study The genetic code and process of translation
ZOO 303 Genetics	1)	Illustrate the Co-dominance and Incomplete dominance
	2)	Apply knowledge of Sex linkage, sex limited and sex influenced
		characters
ZOO 304 Practical ZOO301 +	1)	Use of ELISA technique (HIV) or any suitable method
ZOO302	2)	Understand Determination of Antigen and Antibody reaction by
		using any suitable method
	3)	Apply knowledge Become skilled in Isolation and estimation of
		RNA
ZOO 305 Practical ZOO302 +	1)	Calculation of gene frequency of ABO blood group in human
ZOO303		population
	2)	Illustrate the Gene expression in prokaryotic organism (bacteria)

Semester-IV (M.Sc. ZOOLOGY)

After completion of these courses students should be able to;		
Course	Outcomes	
ZOO 401	1) To study of Role of membranes in osmotic and ionic	
(B) Animal Physiology – II	regulation	
	2) Understand Mechanism of muscle contraction	
	3) Explain the Hormonal Control of Reproductive Cycle	
ZOO 402	1) Illustrate Newer trends in systematic	
Systematic and evolutionary	2) Describe the Types of taxonomic keys	
biology	3) Understand Neutral theory of molecular evolution	
ZOO 403	1) Apply knowledge of purpose of writing research report of	
Skill in Communication and Writing	dissertation and thesis	
research Paper	2) Study of Introduction to Bioinformatics	
ZOO 404	Assessing skin sensitivity - locating different receptors	
Practical ZOO 401 + ZOO 402	2) Observe and Recording of lung volumes and capacities	
	by spirometry	
ZOO 405	1) Identification of animals with the help of keys- Fish/	
Practical ZOO 402 + ZOO 403	Birds/ any available species	
	2) Observe Taxidermy of any suitable animal.	
	3) Become skilled in Understand Preparation of Tables and	
	Graphs from the given hypothetical data	

Department of Electronics

Programme Outcomes: B.Sc. Electronics

After successful completion of three year degree program in Electronics student should be able to;		
Programme	Prepare students for prominent career in industry, banks, offices and	
Outcomes	for further academic study.	
Programs Specific Outcome	1) To prepare students as a successful person in a life which cater needs of the society and serve the country.	
	2) To prepare the students for successful career in industry and motivate them for higher education.	
	3) To provide strong platform for analyzing electrical and electronics problems.	
	4) To provide knowledge on basic electronics to Digital electronics and Integrated circuit chips and their applications for the society.	
	5) To provide necessary foundation on computational platforms and software simulation tools.	
	6) To develop observational skills, confidence in using electronics equipment and relate the knowledge of practical concepts for the development of the society.	
	7) To provide comprehensive knowledge and understanding in the relevant fields and enable students to pursue the Electronics subject at an advanced level later and to attract outstanding students from all backgrounds.	

Course Outcomes B. Sc. Electronics

$\underline{Semester-I}$ (F.Y.B.Sc)

After completion of these courses students should be able to;	
Course Outcome	
ELE-101: Network	1) Apply knowledge to develop circuits using electronic devices.
Analysis and	2) Apply the concept and knowledge of electronics devices to real
Semiconductor Diodes	life problems.
	3) Simulate complex circuits and understand the behavior of the
	systems.
	4) Review, prepare and present technological developments.
ELE-102: Digital	1) Apply the concept and knowledge of digital electronics devices to
Integrated Circuits	real life problems
	2) Understand and analyse, linear and digital electronic circuits.
	3) Understand the technology of advances digital computing.
	4) Apply the knowledge of Digital integrated circuit to solve the
	problems of society.

<u>Semester – II</u> (F.Y.B.Sc)

After completion of these courses students should be able to;	
Course	Outcome
ELE-201: Analog Electronics	 Apply the concept and knowledge of integrated circuit chips to develop new systems. Model complex circuits and simulate them. Handle simulation software to analyse electronics circuits.
ELE-202: Linear Integrated Circuits	 Apply practical knowledge to solve real life problems of the society. Understand of the course and create scientific temperament and give exposure to the students for independent use of integrated circuit chips for innovative applications.

Semester – III (S.Y.B.Sc)

After completion of these courses students should be able to;		
Course	Outcome	
ELE-301: Analog Communication	1) Apply knowledge to develop circuits of analog modulation and demodulation.	
	2) Analyse modulation circuits and understand the behaviour of the systems.	
ELE-302: Microprocessors and Applications	1) Apply the concept and knowledge of microprocessors to real life problems.	
	2) Understand and analyse 8085 microprocessor and its programming.	
	3) Review, prepare and present technological developments.	

Semester – IV (S.Y.B.Sc)

After completion of these courses students should be able to;	
Course	Outcome
ELE-401: Digital Communication	 Apply the concept and knowledge of digital communication to develop new systems. Understanding of the course and create scientific temperament and give exposure to the students for independent use of digital communication for innovative applications.
ELE-402: Microcontrollers and Applications	 Apply practical knowledge of microcontrollers to solve real life problems of the society. Gain knowledge of microcontroller programming. Handle hardware and software to shoot problems of the society.

Semester-V (T.Y.B.Sc)

After completion of these courses students should be able to;	
Course	Outcomes
ELE 351: Semiconductor Physics	 Understanding of fundamentals of semiconductor devices. Awareness of IC fabrication techniques. Estimate the number of carriers at a given temperature for a semiconductor. Understand the importance of doping to change carrier density
ELE 502: Advanced Digital System Design using VHDL	 Students will able to design digital circuits according to requirements. Student will able to write VHDL code for digital circuit with the help of different modeling style. Acquiring principles required for designing of advanced digital systems. Basic knowledge of Hardware Description Languages (HDL). Designing of combinational and sequential logic circuits using VHDL.
ELE 503: Advanced Microprocessor	 Learning architecture of 8086. Assembly language programming of 16 bit microprocessor Aquent knowledge of Assembly language programming of 16 bit microprocessor Able to Aware about the microprocessor and its architecture considerations & Capable to analyze the operating modes. Student will be able to understand the advanced microprocessor 80386 and operation of paging mechanism. To gain the Knowledge about the Pentium series processor
ELE – 504: Electronic Instrumentation	 Understand the concept of measurement systems and its various characteristics Learn about different types of transducers and their working principle. Know the different electronics measuring instruments and develop the skill to handle them. Aquent the knowledge of testing instruments.
ELE 505 : Medical Electronics	 Learn biological signals present in human body Learn the various blocks of biomedical sensors The electrodes which are normally used to measure the biological signals Understand the working principles of various therapeutic and monitoring systems Understand recording and analysis of prominent bio-signals of human Understand the measurement and analysis techniques for physiological parameters Understand the patient imaging and monitoring systems

ELE 506 (A): Embedded C	 Learn structure oriented programming concepts required in all other languages. After completion of this course students are able to built real world applications based on embedded system and automation.
ELE-506(B): Basics of Fiber Optic Communication	 Recognize and classify the structures of Optical fiber and types. Classify the Optical sources, detectors and to discuss their principle. Understanding losses and dispersion. Awareness of analog and digital links.

Semester-VI (T.Y.B.Sc)

After completion of these courses students should be able to;	
Course	Outcomes
ELE – 601: Power Electronics	 Students will have fundamental knowledge of semiconductor power electronic device Student can apply this knowledge for designing power electronic circuits
ELE 602: Consumer Electronics	 Understand the various type of microphones and loud speakers. To identify the various digital and analog signal. Understand the various type of consumer goods and acquaint the skill of fault findings. Develop the skill of electronics appliances like Set Top Box, CATV and Dish TV, water purifier, Air conditioner etc. Acquaint the knowledge of different types of Television Technology.
ELE 603: Microprocessor Interfacing Techniques	 Student will be able to Aware about the concept of microprocessor and its interfacing & Capable to analyze the operation and priorities of Interrupt Understand the concept of memory mapping & DMA Student will be able to understand the ADC & DAC interfacing To gain the Knowledge about the programmable interval timer and communication interface 8251 & analyze the operating modes. Interfacing of I/O devices with microprocessor. Introduction to Advance Microprocessors
ELE 604: Computer Network	 Discuss the key technological components of the Network. Evaluate the challenges in building networks and solutions to those.
ELE 605: Embedded Systems	1) To gain the knowledge about the 8051-microcontroller programming such as timer & counter and serial port programming

	D) II 1 4 1 1 1 1 4 C 1 4 C 1 11
	2) Understand the basic concept of interfacing with
	microcontroller
	3) Understand the interfacing principle with Stepper motor and
	temperature sensor
	4) To gain the Knowledge about the serial peripheral interface
	and two wire interface.
	5) Advanced microcontroller programming
	6) 8 bit microcontroller interfacing
ELE 366: (A) Electrodynamics	1) Understanding of fundamentals concepts of electrodynamics
	and electromagnetics.
	2) Inculcate basic knowledge of electromagnetic waves and
	their propagation
	3) Apply Gauss Law, Amperes Force Law, Lorentz's force,
	Biot-Savarts Law, Faraday's Law for solving the problems in
	Electrostatic and Electromagnetic Fields.
	4) Apply the principle of electrostatic to the solutions of
	problems related to electric field and electric potential,
	boundary value problem in electrostatic field.
	5) Understand the concept of Faradays law, Lenz's Law and
	Maxwell Equation
	6) Apply the Maxwell's equation in free space, linear isotropic
	media and varying fields, energy and electrostatic fields.
ELE-606 (B) Antennas and Wave	1) The student will be able to Understand how the
propagation	electromagnetic wave propagate from an antenna
	2) Learn the concept of RF feeding to an antenna
	3) To calculate the various parameters of antenna to know its
	efficiency.
	4) Study the various types of antennas used in recent
	communication systems.
	5) Understand the wave propagation through space.

POST GRADUATE (PG)

Programme Outcomes: M.Sc. Electronics

Department of Electronics	After successful completion of three year degree program in Electronics student should be able to;	
Programme Outcomes	1) Identify, formulate, research literature, and analyze complex	
	problems reaching substantiated conclusions using first	
	principles of Electronics science.	
Programs Specific	1) To enhance the knowledge in multidisciplinary approach in	
Outcome	the field of Basic	

2)	Technologies in electronics, Embedded Systems,
	microwaves, network analysis and synthesis, MEMs,
	nanoelectronics, control systems, ASIC and FPGA.
3)	To provide quality education through innovative teaching and
	learning processes
4)	To promote scientific and educational activities towards the
	advancement of the theory, projects and practice of
	Electronics fields and related arts and sciences.

Course Outcomes M. Sc. Electronics

Semester-III

After completion of these courses students should be able to;	
Course	Outcomes
ELE-301: Digital Signal Processing	1) Know the basics of digital signal processing
	2) Show skills to design of filters for real time application.
	3) Exhibit the knowledge of DSP algorithms on DSP Platforms.
	4) Demonstrate the ability to analyze filter structures
ELE-302: Microwave Devices and	1) Understand Basics of Microwave and its components
Circuits	2) Identify different microwave devices with their operating principle.
	3) Understand the designing of antenna and its parameter
	4) Gain knowledge of microwave detection and measurement
	which opens up a whole new career option
ELE-303: Embedded System	1) Consider the different constraints of embedded system
Design	design
	2) Use the I2C, SPI communication protocols.to interface the
	devices with controllers.
	3) Establish Controller Area Network and program it.
	4) Familiar with AVR, PIC controllers and able to interface all
	peripherals with these controllers
	5) Use the Arduino boards for various applications at professional level.

Semester-IV

After completion of these courses stud	dents should be able to;
Course	Outcomes
ELE-401: Network Analysis and synthesis	 Know the various types of electronics network and its mathematical models. Solve the electronics networks using mathematical
	theorems.3) Use the Laplace transform to solve electronic network.4) Know the network functions and synthesis techniques.
ELE-402: Nano Electronics & MEMS	 Explain the properties of Nano particles and Nanotube with their applications in electronics. Identify the suitable MEMS transducer for a given electronic system.
ELE-403: (A) Control systems	 Know the concepts of sensing physical parameters and convert it into electrical parameter. Have knowledge of open loop and close loop control systems. Able to analyze the control system by various mathematical theorem. Able to analyze the signal in time domain and frequency domain. Know the various signal controllers.
ELE-403: (B) ASIC & FPGA	 Know the difference between ASIC and FPGA and its application. Design and develop digital circuit using FPGA. Gain the knowledge of FPGA and its system design which unlock the new area of profession.

Ph.D. (Electronics)

Programme Outcomes (POs)	Program Specific Outcomes (PSOs)
 The Ph.D. Course provides: A period of sustained in-depth study of a specific topic; An environment that encourages the student's originality and creativity in their research; Skills to enable the student to critically examine the background literature relevant to their specific research area; The opportunity to develop skills in making and testing hypotheses, in developing new theories, and in 	At the end of their PhD course, students will: • Have a thorough knowledge of the literature and a comprehensive understanding of scientific methods and techniques applicable to their own research; • Be able to demonstrate originality in the application of knowledge, together with a practical understanding of how research and enquiry are used to create and interpret knowledge intheir field; • Have developed the ability to critically evaluate current research and research techniquesand methodologies;

- planning and conducting experiments; developing practical research skills and learn new state of the art techniques used in scientific research.
- The opportunity to expand the student's knowledge of their research area, including its theoretical foundations and the specific techniques used to study it;
- An environment in which to develop skills in written work, oral presentation and publishing the results of their research in highprofile scientific journals, through constructive feedback of written work and oral presentations.

- Have self-direction and originality in tackling and solving problems;
- He able to act autonomously in the planning and implementation of research; and
- Have gained oral presentation and scientific writing skills.

Department of Mathematics

UNDER GRADUATE (UG)

Programme Outcomes: B.Sc. Mathematics

After successful completion of three year degree program in Mathematics student should be able to;

Course Objectives

- A student should be able to recall basic facts about mathematics and should be able to display knowledge of conventions such as notations, terminology and recognize basic geometrical figures and graphical displays, state important facts resulting from their studies.
- A student should get a relational understanding of mathematical concepts and concerned structures, and should be able to follow the patterns involved, mathematical reasoning.
- A student should get adequate exposure to global and local concerns that explore them many aspects of Mathematical Sciences.
- A student be able to apply their skills and knowledge ,that is, translate information presented verbally into mathematical form, select and use appropriate mathematical formulae or techniques in order to process the information and draw the relevant conclusion.
- A student should be made aware of history of mathematics and hence of its past, present and future role as part of our culture.

Programme Specific Outcome

- 1. Give the students a sufficient knowledge of fundamental principles ,methods and a clear perception of innumerous power of mathematical ideas and tools and know how to use them by modeling ,solving and interpreting.
- Reflecting the broad nature of the subject and developing mathematical tools for continuing further study in various fields of science
- Enhancing students' overall development and to equip them with mathematical modeling abilities, problem solving skills, creative talent and power of communication necessary for various kinds of employment
- Enabling students to develop a positive attitude towards mathematics as an interesting and valuable subject of study.

Semester I (F.Y.B.Sc. Mathematics)

After completion of these courses students should be able to;	
Course	Course Outcomes
MTH 101: Matrix Algebra	 Understand concepts on matrix operations and rank of the matrix. understand use of matrix for solving the system of linear equations. Understand basic knowledge of the Eigen values and Eigen vectors. Apply Cayley-Hamilton theorem to find the inverse of the matrix. Know the matrix transformation and its applications in rotation, reflection, translation.
MTH 102: Calculus	 Understand basic concepts on limits and continuity. Understand use of differentiations in various theorems. Know the Mean value theorems and its applications. Make the applications of Taylor's, Maclaurin's theorem. Know the applications of calculus.
MTH 103(B): Graph Theory	 Make the applications Graph, Simple graph, Multigraph, Hand shaking lemma, Types of Graphs, Operations on graphs, Subgraphs, Isomorphism of graphs, Walk, path, cycles Solving examples of Connected and disconnected Graphs, bridges, Cut vertices, edge connectivity and vertex connectivity, Eulerian graph, Hamiltonian Graph, Planer Graph, Euler's Formula for planer graphs, Kuratowski's two graph, Geometrical dual Solve problems on Definition and some properties of trees, Distance and Centre in a tree, Definitions of Rooted and Binary trees, Spanning trees, Minimal Spanning trees, Directed graphs, some types of digraphs.

Semester II

Course	Course Outcomes
MTH 201: Ordinary	1) Understand basic concepts in differential equations.
Differential Equations	2) Understand method of solving differential equation
_	3) Understand use of differential equations in various fields.
MTH 202: Theory of	1) Students can find out roots of any equation of degree less than or
Equations	equal to five. Theory of equations is highly useful in various
	subjects like algebra, linear algebra, calculus, ordinary and partial
	differential equations etc.
MTH 203(A): Laplace	1) Understand basic concepts on Laplace and Inverse Laplace
Transform	transforms
	2) Understand convolution theorem.
	3) Understand use of Laplace transform in solving Differential
	Equations.

Semester-III

After completion of these cour	After completion of these courses students should be able to;	
Course	Course Outcomes	
MTH 301: Calculus of Several Variables	 limit and continuity of functions of several variables Fundamental concepts of multivariable Calculus. Series expansion of functions. Extreme points of function and their maximum, minimum values at those points. Meaning of definite integral as limit as sums. how to solve double and triple integration and use them to find area by double integration and volume by triple integration 	
MTH -302(A): Group Theory	 Understand group and their types, which is one of the building blocks of pure and applied mathematics. understand Lagrange, Euler and Fermat theorem understand concept of automorphism of groups understand concepts of homomorphism and isomorphism Understand basic properties of rings and their types such as integral domain and field. 	
MTH 304: Set Theory and logic	 Uses of the language of set theory, designing issues in different subjects of mathematics understand the issues associated with different types of finite and infinite sets via countable uncountable sets knowledge of the concepts and methods of mathematical logic, set theory, relation calculus, and concepts concerning functions which are included in the fundamentals of various disciplines of mathematics understanding the role of propositional and predicate calculus e) able to provide the logical mathematical reasoning, formulate theorems and definitions 	

Semester-IV

After completion of these courses students should be able to;		
Course	Course Outcomes	
MTH -401: Complex Variables	 The course is aimed to introduce the theory for functions of complex variables Students will understand the concept of analytic function Students will understand the Cauchy Riemann Equations Students will understand harmonic functions Students will understand complex integrations Students will understand calculus of residues. 	
MTH-402(A): Differential Equations	 Students will acquire the skill of contour integrations. Students will aware of formation of differential equations and their solutions Students will understand the concept of Lipschitz condition Students will understand method of variation of parameters for second order L.D.E. Students will understand simultaneous linear differential equations and method of their solutions Students will understand Pfaffian differential equations and method of their solutions Students will understand difference equations and their 	
MTH 404: Vector Calculus	 solutions. understand scalar and vector products Understand vector valued functions and their limits and continuity and use them to estimate velocity and acceleration of partials. Calculate the curl and divergence of a vector field. Set up and evaluate line integrals of functions along curves. 	

Semester-V

After completion of these courses students should be able to;		
Course	Course Outcomes	
MTH - 501: Metric Spaces.	 Deal with various examples of metric spaces; Have some familiarity with continuous maps; Work with compact sets in Euclidean space; Work with completeness; Apply the ideas of metric spaces to other areas of mathematics. 	
MTH - 502: Real Analysis –	1) Explain the completeness of a system of real numbers: a least upper bound, a greatest lower bound.	

	2) Elaborate on the topological concepts of the real numbers: open sets, closed sets, accumulation points, closure, open
	covers, compact sets.
	3) Define and utilize the following concepts: sequence,
	subsequence, monotone sequence, Cauchy sequence.
	4) Prove that a given function is continuous or discontinuous
	and classify its points of discontinuity.5) Justify the convergence/divergence of a given number series;
	6) Prove some of the classical theorems of real analysis.
MTH -507 (PRACTICAL	1) Solve problems related to topics in the syllabus of Metric
COURSE BASED ON	Spaces and real analysis I.
MTH-501 & MTH-502)	2) Determine metric, solve problems related to metric spaces,
	open spheres, open sets, closed set, limit point, bounded
	metric, equivalent metric, continuous functions, completness,
	compactness, uniform continuity, finite intersection property
	3) Compute lub, glb of a set 4) Find the limit of acquence, sum of series
	4) Find the limit of sequence, sum of series5) Determine the open sets, closed sets, accumulation points,
	points of dicontinuity
	6) Able to classify wheter a function is continuous,
	discontinuous
MTH - 503: Algebra	1) Solve problems related to all topics in the 1. Normal
	subgroups, Quotient groups, Isomorphism theorems for
	groups, Isomorphism theorems for groups and examples,
	Generator of a subgroup, Commutator subgroup,
	Automorphism and inner automorphism
	2) Demonstrate when a binary algebraic structure forms a Permutations Cycles of permutation, Disjoint permutations,
	Permutation groups.
	3) Determine Ring, integral domain, field, zero divisors, and
	basic properties, Characteristics of a ring, Subrings, ideals, left
	ideals, right ideals, principal ideals, prime ideals, maximal
	ideals, Quotient rings, Field of quotients of an integral
	domain, Homomorphism of rings, Isomorphism theorems for
	rings. 1) Definition of a malymomial ring Proporties of malymomial
	4) Definition of a polynomial ring, Properties of polynomial rings, Division Algorithm, Reducible and Irreducible
	rings, Division Algorithm, Reducible and Irreducible polynomials, Eisenstein's Criterion.
MTH -504: Lattice Theory	Interpret Diagrammatical Representation of posets, Maximal
lead of the state	and Minimal elements of subset of a poset, Zorn's Lemma.
	2) Comparing Two definitions of lattice and equivalence of two
	definitions. Modular and Distributive inequalities in a lattice,
	Sublattice and Semilattice, Complete lattice.
	3) Solving examples on Modular lattice, Distributive lattice,
	Sublattice of Modular lattice, Homomorphic image of
	Modular lattice, Complemented and Relatively
	complemented lattice

MTH -505: Integral	1) Know the use of Fourier transform in Wave equation,	
Transform	2) Solve Boundary Value Problems, also problem on Heat-flow in semi-infinite bar.	
	3) 3. Use Fourier transform in communication theory and signal analysis, image processing and filters, data processing and analysis, solving partial differential equations for problems on gravity.	
	4) Students will be able to use Z-transform in the characterization of Linear Time-Invariant system (LTI), in development of scientific simulation algorithms	
MTH-506(A) C-	1) Uses Arithmetic expression and its evaluation precedence of	
Programming	arithmetic operators type, Conversion, operator precedence, mathematical functions, Reading and writing a character, Formatted input and output, Decision making, if, is-else, else-if, switch and go to statements.	
	2) Uses Sentinel loops. While loop, do-while loop and for statements, Jump in loops, continue, break and exit statements.	
	3) Uses one dimensional, two dimensional and multidimensional arrays. Declaration and initialization of arrays Need for user defined functions, multi-function program, Elements of function, definition of functions, return values and their types.	

Semester-VI

After completion of these courses students should be able to;		
Course	Course Outcomes	
MTH -601 : Measure and Integrations Theory	 To gain understanding of abstract measure theory ,definitions and properties of integrations 2. To construct lebesgue measure on real line and in n-dimensional Euclidean space. 3. Explain the concept of length, area, volume of subsets of n-dimensional spaces. 4. Understand how to integrate functions having uncountable 	
MTH 602: Real Analysis II	discontinuity. 1) Define Riemann integrable and Riemann sums 2) Prove a theorem about Riemann sums and Riemann integrals 3) Knowledge of some simple techniques for testing the convergence of sequences and series of functions, and confidence in applying them.	
MTH - 603: Linear Algebra	 Define and compute Eigen vectors and Eigen values. Define a vector space and state its properties. 	

	3) Compute the linear span of a set of vectors.
	4) Determine the linear independence or dependence of a set of
	vectors.
	5) Determine a basis of a vector space.
	6) Explain the ideas of linear independence, spanning set, basis,
	and dimension.
	7) Define and identify linear transformations.
MTH 604: Ordinary and	1) Distinguish between linear, nonlinear, partial and ordinary
Partial Differential	differential equations.
Equation	2) State the basic existence theorem for 1st order ODE's and use
Equation	the theorem to determine a solution interval.
	3) Recognize and solve a variable separable differential
	equation. 4. Recognize and solve a homogeneous differential
	equation.
	4) Recognize and solve an exact differential equation.
	5) Recognize and solve a linear differential equation by use of
	an integrating factor.
	6) Make a change of variables to reduce a differential equation
	to a known form.
	7) Find particular solutions to initial value problems.
	8) Solve basic application problems described by first order
MTU 606(P). Operations	differential equations.
MTH 606(B): Operations Research	1) Formulate optimization problems;
Kesearch	2) Understand and apply the concept of optimality criteria for
	various type of optimization problems;
	3) Solve various constrained and unconstrained problems in
	single variable as well as multivariable;
MTH (07 C) TH	4) Apply the methods of optimization in real life situation.
MTH 605: Graph Theory	1) Understanding a functional hierarchical code organization.
	2) Ability to define and manage graphs, connected graphs.
	3) Understanding a concept of Cut set and cut vertices

M.S.c. Mathematics

Course Objectives	Programme Specific Outcome
1. A student should be able to understand	1. Strengthening the understanding of the
the proof techniques in	students and substantiating the
Mathematics and importance of theorems for	conceptual framework of the Graduates in
sorting out typical examples.	Mathematics for furthering their
2. A student should acquire sufficient technical	potential and capabilities in the subject.
competence to solve the problems of varying	2. Introducing advanced theories in the subject in
difficulty levels and high notational complexity.	an orderly manner with a clearly defined path of
3. A student should be able to make	interdependence.
observations, experimentation and pattern	3. Introducing the specializations in different

recognition, which would stimulate the research potential

4. A student should acquire the communication skill to present technical Mathematics so as to take up a career in Teaching Mathematics at various levels including schools, colleges, universities, etc.

areas of Mathematics and at the same time emphasizing the underlying interconnections in different branches of

Mathematics.

- 4. Generating more interest in the subject and motivating students for self-learning beyond the realm of syllabi and examinations.
- 5. Inculcating the spirit of inquiry among the students and preparing them to take up the research in Mathematics.
- 6. Exhibiting the wide range of applications of Mathematics and preparing students to apply their knowledge in diverse areas such as Physics, Astronomy, Biology, Social Sciences, etc.

Course outcomes

Class	Course	Course Outcomes
M.Sc.	MT-101-	Upon successful completion of this course, students will be able
Mathematics	Advanced	to
Part-I	Real Analysis	1. To gain understanding of abstract measure theory, definitions
(SEM-I)	•	and properties of integrations
		2. To construct Lebasque measure on real line and in n-
		dimensional Euclidean space.
		3. Explain the concept of length, area, volume of subsets of n-
		dimensional spaces.
		4. Understand how to integrate functions having uncountable
		discontinuity.
	MT-102-II	Upon successful completion of this course, students will be able
	Topology I	to :
	2 30	1. Understand topics Topological spaces and continuous
		functions: Topological spaces, Basis for topology. The order
		topology, subspace topology, closed sets and limit points,
		continuous functions, The product topology, Continuous
		functions, Metric topology, The quotient topology.
		2. Compute the Connectedness and compactness: Connected
		spaces, connected sets in the real line, components
		and path components, local connectedness compact spaces, Limit
		point compactness.
		3. Learns dealing with Countability and separation axioms: The
		countability axioms, The separation axioms, The Urysohn
		Lemma, Urysohn Metrization theorem.
		4. Use The Tychonoff Theorem, Completely regular spaces.

Mt-103-	A student who has studied and learned the material should be able
Abstract	to:
Algebra	1. Incorporate equivalence relations into group theoretic structures, particularly factor groups.
	 Determine subgroups and determine whether given subsets of a group are subgroups. Use the Fundamental Theorem of Cyclic Groups to classify
	and determine subgroup structure of non-cyclic groups. 4. Construct and manipulate group homomorphisms and isomorphisms.
	5. Recognize and interpret theorems to prove properties about specific algebraic structure.
	6. Use the skills of proof by contradiction, proof by contraposition, proof of set equality, and proof using both forms mathematical induction.
	7. Define and test a potential isomorphism for being well-defined, a homomorphism, one-to-one and onto.
	8. Use definitions of one-to-one, onto, well-defined, homomorphism, isomorphism and others to characterize a given
	map.
	9. Create factor groups using normal subgroups or the First Isomorphism Theorem and interpret elements of factor groups accurately.
	10. Demonstrate understanding of permutations and symmetries in a group theoretic context–articularly the significance of Cayley's Theorem.
	11. Recognize and use the Sylow Theorems to characterize certain finite groups.
MT-104- Ordinary and	After studying this course, Student should be able to: • Effectively express the concepts and results of Second Order
Partial	L.D.E. with constant Coefficients: Basic theory of linear
Differential	differential equations (L.D.E), the homogeneous and non-
Equations	homogeneous L.D.E. with constant coefficients; finding C.F. and P.I. the method of undermined coefficients, Variation of
	Parameters, The Cauchy-Euler equation; Theorems on second
	order homogeneous L.D.E. (12 Hours)
	• Linear PDE order one: Introduction, origin, derivation of PDE
	by removing arbitrary constant and function; Lagrange's method
	of solving $Pp + Qq = R$; Type-I, II, III, IV for solving $dx/P = dy/Q = dz/R$; Integral surfaces passing through a given curve.
	• solves examples on Non-Linear PDE of order one : Complete
	integral, P.I., singular integral, general integral for PDE of first
	order; general method for solving PDE of order one and any
	degree, Charpit's method; Standard form when p and q are

present. Clairaut's equation z = px + qy + (, q); standard form when only p, q and z are present; Jacobi's method.

• Solves Linear PDE with constant coefficients: Homogeneous

	ī	
		and non-homogeneous linear PDE with constant coefficients.
		Methods of finding C.F. and P.I. for non-homogeneous. Linear
		PDE.
	MT-106:	After studying this course, Student should be able to:
	Programming	1. Understands Elementary Concepts: Introduction, output
	in C++	operator, characters, literals, variables and declaration, program
		token, initializing variables and constants, input operator and
		output operator, simple programs.
		2. Using Fundamental Types: Numeric, Boolean, enumeration,
		character, integer, arithmetic, increment, decrement, and
		composite assignment operators. Floating point, type conversion,
		numeric outflow, round-off error, and the e-format.
		3. Using Conditional statements: If and If-Else statements,
		statement blocks, compound conditions, shortcircuiting, Boolean
		expressions, nested selection, else-if, switch statements and
		conditional expression operators
		4. Using Functions sense: Standard library functions, user
		defined functions, test drivers, functional declarations, local
		variables and functions, void functions, Boolean functions, Input-
		Output functions, passing by reference, passing by constant
		reference, inline function, slope, over loading, main function,
		default arguments.
M.Sc.	MT-201:	On completion of this unit successful students will be able to:
Mathematics	General	1. The Concepts Abstract Measure Space: Measures and outer
Part-I	Measure	measure, Extension of a measure, Uniqueness of extension,
(SEM-II)	Theory	Completion of a measure, Measure spaces, Integration w.r.t. a
		measure.
		2. Study the theorems on Integration and Lp-spaces: The Lp-
		spaces, Convex functions, Jensen's inequality, the inequalities of
		Holders and Minkowski. Completeness of Lp (μ) (Reisz Fisher
		Theorem)
		3. Solving examples based on Convergence: Convergence in
		measure, almost uniform convergence, Egoroffs theorem,
		Lusin's theorem, Convergence diagram, Counter examples.
		4. solving examples on Signed measure and their derivatives:
		Signed measures and The Hahn Decomposition, The Jordan
		Decomposition, The Radon-Nikodym theorem, Some
		applications of the radon theorem, bounded linear functional on
	1	$\mid Lp$.

1	
MT-202: Complex Analysis	On completion of this unit successful students will be able to: 1. Understand the significance of differentiability for complex functions and be familiar with the Cauchy-Riemann equations; 2. Evaluate integrals along a path in the complex plane and understand the statement of Cauchy's Theorem; 3. Compute the Taylor and Laurent expansions of simple functions, determining the nature of the singularities and calculating residues; 4. Use the Cauchy Residue Theorem to evaluate integrals and sum series.
MT-203: Linear Algebra	Upon successful completion of this course, students will be able 1. To write precise and accurate mathematical objects in Modules, Submodules, R-homomorphism, Isomorphism, Direct sum of modules, free modules, Rank, Structure theorem for finitely generated modules over PID, Application to group Theorem. 2. For checking the irreducibility of Jordan and Rational canonical forms. 3. To understand the concepts like ideals and quotient rings. 4. To understand the generalization of vector spaces over fields to modules over rings 5. To write about ring theory in a coherent, grammatically correct and technically accurate manner.
MT-204: Mathematical Methods	Upon successful completion of this course, students will be able: 1. Define and compute Linear boundary value problems: Introduction, derivation of wave equation, heat equation and Laplace's equation in Cartesian, cylindrical and spherical coordinates. Principle of superposition, series solutions, separation of variables, types of initial value problems and general solution of partial differential equation. 2. Define a Orthogonality: Orthogonality of sets of functions in the space of piecewise continuous functions on (a,b) generalized Fourier Series, approximation in the mean, closed and complete orthonormal sets. Fourier series and half range Fourier series, Sturm-Liouville problems, orthogonality of the eigen functions and their uniqueness 3. Compute Boundary value problems: Boundary value problems involving the wave equation, heat equation and Dirichlet's problems. Solution by the method of separation of variables, temperature in a long Cylinder, heat transfer at the surface of the cylinder and vibrations of the circular membrane. the linear span of a set of vectors. 5. Spanning set, basis, and dimension. 6. Define and compute the characteristic polynomial of a matrix.

	MT-205: Number Theory	Upon successful completion of this course, students will be able to : 1. Explain clearly concepts and theory of basic methods for solving Arithmetic functions: The Mobius function $\mu(n)$, The Euler totient function $\phi(n)$, Dirichlet product of arithmetic functions, Dirichlet inverses and the Mobius inversion formula. The Mangolt function $\Lambda(n)$, Multiplicative functions, Dirichlet multiplication, The inverse of a completely, multiplicative function, Liouvilles function $\lambda(n)$, The divisor function $\sigma(n)$, Generalized convolutions. Formal power series, Bell series of an arithmetical function, Bell series and Dirichlet multiplication, Derivatives of arithmetical functions, The Selberg identity. 2. Recognize the Congruences: Residue classes, Complete and reduced residue systems and Euler-Fermat's theorem, Polynomial congruences $mod\ p$. Lagranges theorem and its applications, Polynomial congruences with prime power moduli. The principle of cross classification. 3. Quadratic residues and Quadratic Reciprocity law: Quadratic residues, Legenre's symbol and its properties, Evaluation of $(-1 p)$ and $(2 p)$, Gauss lemma, The Quadratic Reciprocity law and its applications, The Jacobi Symbol. Applications to Diophantine equations. 4. Recognize the concept of Primitive roots: The exponent of a number modulo m, Primitive roots, Primitive roots and reduced residue systems, The non-existence of primitive roots $mod\ p\ n$ and $p\ 2n$ for odd primes $p\ and\ n\ge 1$. The non-existence of
M.Sc. Mathematics Part-II (SEM-III)	MT-301: Topics in Functional Analysis	*
(32.11-111)	1 XII al y SIS	of combinatorial problems 4. Students are able to use addition and multiplication principle. 5. Students can understand the logical structure of programms. 6. It develops proficiency in solving discrete math problems

MT-302:	Upon successful completion of this course :
Statistical	1. Students will appreciate Basic concepts: Discrete and
Techniques	Continuous series, Arithmetic Mean, Geometric Mean,
_	Harmonic Mean, Median and Mode. Range, Quartile deviation,
	Mean deviation, Standard deviation, Variance and coefficient of
	variation.
	2. Solving examples based on Sample space, discrete probability,
	Mathematical theory of probability, independent events,
	Addition and Multiplication theorems of probability, conditional
	probability and Baye's theorem.
	3. Making applications Theoretical distributions: Random
	variable, probability distribution of a discrete and continuous
	random variable. Probability density function, mathematical
	expectation. Binomial, Poisson and Normal distributions and
	their properties.
	4. Correlation: Definition, meaning, scatter diagram method, Karl Pearson's method, Probable error, Standard error and Rank
	correlation and concurrent deviations.
MT-303:	Upon successful completion of this course, students will be able
Topics in	to :
Field Theory	1. Understand the fundamental concepts of field extensions and
	Galois theory and their role in modern mathematics and applied
	contexts
	2. Understand accurate and efficient use of field extensions and
	Galois theory
	3. Understand capacity for mathematical reasoning through
	analyzing, proving and explaining concepts from field extensions
	and Galois theory.
	4. Apply problem- insightful solutions to several classical
	problems, of which the most notable is the problem of solvability
	by radicals: which polynomial equation in one variable can be solved by means of radicals, i.e. via root extraction in addition to
	the usual rational operations of addition, subtraction,
	multiplication and division?
	5. Understand why geometric constructions: squaring a circle,
	doubling a cube and trisecting angle are impossible by using
	compass and scale.
MT-306:	The students who succeeded in this course will be
Theory of	1. Familiar Posets, Semi-lattice, Two definitions of lattices,
Lattices	Congruence relations, Congruence lattice, The homomorphism
	theorem, Product of lattices, complete lattices, ideal lattice, Distributive and Modular Inequalities and Identities,
	Complements, Pseudocomplements, Boolean lattices, Boolean
	lattices of pseudo complements in a meet semi lattice. Atoms,
	Irreducibility of elements.
	2. Able to apply Characterization theorem for modular and
1	11 /

		distuibative lettice Dedelaind's demonstration of a 1.1
		distributive lattice, Dedekind's characterization of modular
		lattice, Birkhoff's characterization of distributive lattices.
		Representation of distributive lattices, Stone theorem, Nabchin
		theorem, Hashimoto's theorem, Distributive lattice with
		pseudocomplementation, Stone lattice, characterization of Stone
		lattice. Stone algebra, characterization of Stone algebra.
		3. Making sense about Distributive, Standard and Neutral
		elements
		4. Able to analyze Kinematics of rigid body motion
		5. Semimodular lattices and Modular pairs
	MT-307:	The students who succeeded in this course;
	Elements of	1. Will be able to understand Definitions and examples, graphs
	Graph	as models, subgraphs, Operations on graphs, Matrix
	Theory	representation of graphs, walks, Trails, Paths, and Cycles.
	lincory	Connectedness and connectedness algorithm.
		2. Will be able to solve problems on Trees and Connectivity:
		<u> </u>
		definition and simple properties of a tree, Bridges, Spanning
		Trees, Cayley's Theorem, Kruskal's Algorithm, Prim's
		Algorithm, Shortest path problems, The Breadth First Search
		(BFS)algorithm, The Backtracing algorithm, Dijkstra's
		Algorithm, Cut vertices, Connectivity
		3. Will be able to describe Eulerian and Hamiltonian Graphs:
		Eulerian trails, Eulerian and semi Eulerian graphs, Fleury's
		algorithm, Hierholzer's algorithm, The Chinese Postman
		Problem, Hamiltonian graphs, Dirac theorem, Closure of a graph,
		Bondy and Chavatal theorem, Travelling salesman problem
		(optimal algorithms and the closest intersection algorithm are not
		expected)
		4. Will be able to analyse the Planar graphs and Coloring of
		graphs: Plane and Planar graphs, Euler's Formula, Vertex
		coloring, Critical graphs, Cliques and edge coloring of graphs.
		5. Will be able to apply Max- Flow, Min- Cut Theorem and
		Ramsey numbers: definition of Ramsey number, Relations
		among Ramsey numbers
		Upon successful completion of this course, students :
		1. Effectively express the concepts and results of Integral
		Equations: Introduction and classification of Linear Integral
		equations; Integration and classification of Linear integral equations; Integrations,
		Degenerate kernels, Hermitian and Symmetric kernels.
		Volterra's equations and resolvent kernel; Convolution type of
		kernels.
	MT 401.	2. Construct mathematical proofs of statements and Fourier
M.C.	MT-401:	Transforms: The Fourier Integral, complex form of Fourier
M.Sc.	Advanced	Integrals and Fourier Integral theorem; Fourier transforms;
	Methods	
(SEM-IV)		relationship between Fourier transforms and Laplace transforms.
Mathematics Part-II (SEM-IV)	Mathematical Methods	properties, Fourier Cosine and Sine Transforms, finite Fourier transforms, convolution theorem, Parsvals Identity and relationship between Fourier transforms and Laplace transforms.

- 3. understand the Calculus of Variations: A basic lemma, statement and formulation of several problems, the Euler-Laggrange equation, first integrals of Euler-Lagrange equation, Geodesics, Brachistochrome problem, Minimum surface of revolution, several dependent variables, Parametric representation, Undetermined end points, Brachistochrome from a given curve to a fixed point and the simple Isoperimetric problem.
- 4. Understand the logic and methods behind the major proofs in Number Theory.
- 5. Introduction, definition, formulae, properties, definition of inverse Z-transform, properties, application of z-transform to difference equations.

MT-402: Operations Research

Upon successful completion of this course, students 1. Will have the knowledge and skills to explain the concepts PERT AND CPM: Introduction, Phases of project management, Network diagrams, Fulkerson's rule, slack, forward pass, backward pass, critical path, project duration, various floats, tabular form, differences between PERT and CPM, Project cost and crashing Network 2. Can apply Decision theory: Steps involved in Decision theory, decision making under uncertainty, Minimax, Maximin, Maximax, Hurwitz and Laplace criteria. Decision making under risk, Expected monetary value and Expected opportunity loss criteria and EVPI, Decision trees 3. Will be able to compute Replacement Models: Introduction, Replacement of Items that deteriorate with time with no changes in money value, with change in value of money, replacement of items that fail suddenly, individual replacement policy, group replacement policy and staffing problems 4. Can understand the topic Simulation: Introduction, when to use simulation, advantages and limitations of simulation technique, Monte Carlo method, generation of random numbers, time flow mechanism, simulation languages... 5. Can understand the concept of Non-linear Programming: Quadratic program, Wolfe's algorithm, Beale's algorithm. Frank Wolfe's method, reduced gradient method, Kelly's cutting plane method, method of approximate programming, gradient projection method, Generalized Lagrange's multiplier technique, separable programming, linear fractional programming.

3.575.403	TT 0.1 1.1 0.11 . 1 . 111 . 111
MT-403:	Upon successful completion of this course, students will be able
Commutative	
Algebra	 To understand the Modules, Free modules, Projective modules, Tensor product and Flat modules. Noetherian modules, Primary decomposition, Artinian modules To find examples on Integral extensions: Integral elements, Integral extensions and Integrally closed domain. To understand Dedekind domain: Valuation rings, Discrete valuation rings and Dedekind domains
MT-404:	Upon successful completion of this course, students will be able
Advanced	:
Abstract	1. Recognize Basic concepts of maximal ideals, prime ideals and
Algebra	nil radical of an ideal, semiprime ideals, primary ideals, Prime
	avoidance theorem.
	2. Know the Jacobson radical of a ring, Semisimple ring, Prime
	radical of a ring, Quasi-regular element, Jradical, J-semisimple ring, Regular ring.
	ring, Regular ring. 3. Know the main Direct sum of rings, Subdirectly reducible and
	irreducible rings.
	4. To make use Noetherian ring, irreducible ideals, irredundant
	primary representation, Cohen's theorem, Krull intersection
	theorem.
MT-406:	Upon successful completion of this course :
Algebraic	1. The student has knowledge of Geometric complexes,
Topology	polyhedron, orientation of Geometric complexes.
	2. The student understands Chains, Cycles, Boundaries,
	Homology groups, Examples and structure of homology groups,
	The Euler-Poincare theorem, Euler's theorem, Pseudo manifolds,
	Fundamental group of S_n .
	3. Understand and explain Simplicial approximation, Induced
	homomorphism on the homology groups, The Brouwer's fixed
	point theorem.
	4. Describe the applications of Homotopic paths and
	Fundamental groups, Covering homotopy property for S1,
	Examples of Fundamental groups, Relation between first
	homology group and fundamental group

Department of Biotechnology

B.Sc. Biotechnology

able to; Programme Outcomes	 Apply the knowledge of science and biological principle for developing problem solving attitude, independently carrying out research/ investigation and development works. Write and present a substantial technical report/ document Demonstrate a degree of mastery in biotechnology and related sciences. The knowledge should be at a level higher than the requirements in the appropriate nation developed programme. Gain knowledge/ skill in integrating ecological and environmental, agriculture, industrial resources concept for collaborative multidisciplinary solution and carry our planning and management of projects as a member and leader in a team considering economic and financial factors. Recognize the need and have ability in life long learning independently for professional advancement, demonstrat professional ethics, work culture and understanding or responsibility to contribute to community for sustainable development of society.
-----------------------------	--

<u>Semester - I</u>

Course	Course Outcomes
BT.101	1) To study the basic knowledge pertinent to cell as unit, cell
Cell Biology	organelles and its architecture.
	2) To study the structural and functional details of cell.
	3) Find the answers related to the scope of biotechnology.
	4) To understand how science works.
	5) Aware about biotechnology and its application in various field.
BT.102	1) To demonstrate theory and practical skills in different types of
Biochemical tools	microscopy and their handling techniques and staining
	procedure.
	2) To understand the fundamental biotechnical concepts and
	familiarize with standard solution, buffer and reactions.

	3) Describe the concepts of pH and its biological significance,
	buffers, Henderson Hasselbalch equation, biological buffer
	systems and their importance.
	4) To know the terms and terminologies related to basic
	biochemical aspects.
BT. 103	1) To demonstrate practical skill in microscopy, laboratory
Practical paper I	equipment and their handling techniques and staining
(Based on paper I and II)	procedure.
i.e. BT.101 and BT.102	2) To know the various stages of cell division and also understand
	the significance of each event during mitosis and meiosis.
	3) To perform routine safely and effectively.

Semester - II

Course	Course Outcomes
BT.201	1) Overview of major biomolecules carbohydrates, lipids,
Biomolecules	proteins, amino acids, nucleic acids, classification, structure,
	function of above mentioned biomolecules.
	2) Specify the biological significance of biomolecules in
	metabolism.
BT.202	1) To understand the basic microbial structure and study the
Basic microbiology B	comparative characteristics of prokaryotes and eukaryotes and
	familiarize the structural similarities and differences among
	various microbes.
	2) To know various culture media and their applications and also
	understand various physical and chemical means of
	sterilization.
	3) To know general bacteriological and microbial techniques for
	isolation of pure cultures of bacteria, fungi, and algae.
	4) To learn aseptic techniques and be able to perform routing
	culture handling tasks safely and effectively.
	5) To know the various physical and chemical growth
	requirements of bacteria and get equipped with various
DE 202	methods of bacterial growth measurement.
BT.203	1) To demonstrate theory and practical skill in microscopy and
Practical paper II	their handling techniques and staining procedure.
(Based on paper I and II) i.e. BT.201 and BT.202	2) To understand the basic microbial practices and study the
i.e. B1.201 and B1.202	comparative characteristics of prokaryotes and eukaryotes.
	3) Prepare and view specimens using microscopy (bright field
	microscope) A word and train in acentic handling of microbial anadimons
	4) Aware and train in aseptic handling of microbial specimens.5) Practice safe microbiology, using appropriate protective and
	emergency procedures.
	emergency procedures.

Semester – III

Course	Course Outcomes
BT.301	1) To understand basic concept of gene, DNA
Basic genetics	2) To study mutation and chromosomal variations
	3) Learn basic aspect about gametogenesis and cell cycle.
	4) To understand the Mendel's laws.
BT.302	1) To study the concept and significance of bioprocess technology
Bioprocess technology	2) Range of bioprocess technology and chronological
	development.
	3) Basic principal components of fermentation technology.
	4) To study the screening of industrially important
	microorganisms – primary, secondary, crowded plate method;
	strain improvements.
	5) Working and principal of culture collection centers.
	- National: NCIM, MTCC
	- International: ATCC
BT.303	1) Acquaint with different problems regarding genetics.
Practical paper III	2) To know various stages of cell division and understand the
(Based on paper I and II)	significance of each events during mitosis and meiosis.
i.e. BT.301 and BT.302	3) To developed skill about isolation of industrially important
	microorganisms and familiar with analytical techniques.
SEC.I	1) Know the classification of different varieties of fungi
Algae and mushroom	2) To understand the technique used in the cultivation of edible
cultivation	mushroom.
	3) To study the harvesting of mushroom crop.
	4) Gain adequate knowledge on comparative account of various
	algae
	5) Understand cultivation methods with biofuel technology.
	6) Know about commercial and transportation issues of biomass.

Semester – IV

Course	Course Outcomes
BT.401	1) To understand the basic structure of DNA.
Molecular Biology	2) To understand the central dogma of molecular biology.
	3) To understand the process of replication, transcription,
	translation.
	4) To learn regulation of all molecular processes.
BT.402	1) To know the cellular ontogeny and organ involvement in
Immune Response	immunity.
	2) To study the principles of self-tolerance and autoimmunity.
	3) To know the how the immune system can fight infection and
	cancer, including examples of immunodeficiency diseases.
	4) Know the difference between innate and adaptive immunity.

	5) To understand what antigens are and how they are presented.6) To understand the mechanisms involve in control of immune	
	responses.	
BT.403	1) To understand basics in serological practicals and its handling.	
Practical paper IV	2) Aware of molecular biology techniques about isolation of	
(Based on paper I and II)	metabolites.	
i.e. BT.401 and BT.402	3) Aware and train spectrophotometric estimation of metabolites.	
	4) To know about the basic concept in immunology.	
SEC.II	1) Acquire comprehensive knowledge of the equipment used in	
Bioanalytical	life sciences will be offered in the course an overview of the	
Instrumentation	instrumentation used in isolation and separation of molecules	
	will also be provided.	
	2) Enable the student to understand all aspects of	
	bioinstrumentation and tools and techniques used therein.	

Semester – V

Course	Course Outcomes	
BT.501	1) To provide basic knowledge about the fundamental molecular	
Genetics and Molecular	process of living cells.	
Biology	2) To introduce the students to the principles of ecology and	
	genetic disorders.	
	3) Students will gain and understanding of chemical and	
	molecular processes that occur in and between cells.	
	4) The course particularly aims at understanding structure,	
	synthesis and replication of nucleic acids.	
BT.502	1) To introduce the students to the basic principles of animal	
Animal Tissue Culture	tissue and cell culture.	
	2) The course will describe as to how animal cell culture is carried	
	out for research and diagnostic purposes.	
	3) Gain and understanding of cell culture techniques and their	
	application.	
	4) To understand concept of transgenesis, transgenic animal and	
	their application as well as the human health care	
	biotechnology.	
BT.503	1) This paper is introduced to acquire requisite skills for the	
Bioengineering	design and development of bioreactors, media, sterilization,	
	microbial growth etc.	
	2) To understand fundamental principles bioprocess and	
	bioengineering.	
	3) To understood fermentation media, sterilization as well as	
	media optimization concept of transgenic animals and their	
	application as well as the human health care biotechnology.	
	4) Understand the basics of fermentation technology and learnt	
	the concept of screening, optimization and maintenance of cultures.	

DT 504	41	TD1 '1 1 1 0 1 1 1 0 0
BT.504	1)	The course provides understanding of microbial analysis of
Food Biotechnology		milk, microbial production of fermented food viz. cheese,
		bread etc.
	2)	To understand fundamental principles food and milk
		microbiology.
	3)	To understand fermented product and pasteurization of milk.
	4)	To understand the basics of food spoilage, food preservation
	-,	and fermented food.
BT.505	1)	To understand applications of biotechnology in agriculture,
Agricultural	1)	plant disease control and floriculture.
Biotechnology	2)	<u> </u>
Diotechnology	2)	microflora and its role in the rhizosphere.
	2)	•
	3)	To understood the basics of plant pathology and disease
DT 50C(A)	41	control, horticulture and floriculture.
BT.506(A)	1)	To study domestic waste water treatment and classification of
Environmental	•	waste water treatment.
Biotechnology-I	2)	To study biodegradation – concept, biodegradation of
		hydrocarbon, measurement of biodegradation.
	3)	Bioremediation – concept, methods of bioremediation (In-situ
		and Ex-situ bioremediation)
	4)	To understand xenobiotic and recalcitrant, metabolism of
		xenobiotics.
BT.506(B)	1)	Student will be able to characterize data and understand
Biostatistics		different sampling methods.
	2)	Use descriptive tools to summarize and display biological data.
		To identify appropriate statistical methods to be applied in a
	,	given research setting, apply these methods, and acknowledge
		the limitations of those methods.
BT.507	1)	Student are able to understand and perform: Fermentation
Practical Course:	-,	production of antibiotics/ vitamins, amylase/ lipase, alcohol,
Industrial Biotechnology		organic acid, acetic acid.
	2)	Estimation of ascorbic acid, penicillin/ streptomycin,
	-)	preparation of saurkaut.
BT.508	1)	
Practical Course: Animal	1)	preparation, sterilization, washing, identification of different
		= =
<i>&</i>	2)	cell types.
Immunology	4)	Immunological techniques: agarose gel electrophoresis,
		diffusion technique, ELISA tests, immobilization, blood
DT 500	41	typing.
BT.509	1)	Student are able to understand and perform: Isolation and
Practical Course:	•	characterization of : food fermenting organism.
Environmental	2)	Detection of aflatoxin in food, BOD, COD, MBRT of milk,
Biotechnology		identification of different cell types, carbohydrates and
		phosphorus and nitrogen of soil.

Semester – VI

Course	Course Outcomes	
BT.601	1) To study basic principles of genetic engineering, enzymes,	
Recombinant DNA	vector types, methods of gene transfer.	
technology	2) To study gene cloning: indirect and direct screening.	
	3) Expression strategies for heterologous genes, gene bank,	
	animal farming.	
	4) Techniques and application of DNA sequencing.	
BT.602	1) To study the basic principles of immune system, types of	
Immunology	immunity, primary and secondary lymphoid organ.	
	2) Antigen presentation, immune response lymph organs,	
	complement system, immunological disorders.	
	3) To study Ag-Ab interactions, precipitation, agglutination, RIA,	
	ELISA, monoclonal antibodies.	
BT.603	1) To study the basic principles of upstream and downstream	
Bioprocess Technology	process of different commercially important product;: enzyme,	
	antibiotics, organic acids.	
	2) To understand quality and economic aspects ion fermentation.	
	3) To understand the principles and role of biotechnologist in QA,	
	QC, IPR and patenting.	
BT.604	1) Gain basic knowledge applications of biotechnology in the	
Pharmaceutical	field of pharmaceuticals.	
Biotechnology	2) Student will understand the concept of drug discovery, drug	
	designing.	
	3) Student will get knowledge of various medicinally important	
	secondary metabolites as well as the role of recombinant DNA	
	technology for the improvement of productivity and efficacy.	
BT.605	1) To understand totipotency, organization of plant tissue culture,	
Plant Biotechnology	aseptic technique of PTC, meristem culture, organ culture.	
	2) To study the principle and applications of phytohormones.	
	3) Transgenic plants- methods, analysis, applications.	
	4) To study the concept of transformation and role of	
DT (0)(Agrobacterium. 1) To ynderstand hasis knowledge of methods applications of	
BT.606	1) To understand basic knowledge of methods applications of	
Environmental	taxonomy, nomenclature respect to plants, animals and	
Biotechnology- II	prokaryotes. 2) To study principles and applications bioprospecting	
	2) To study principles and applications bioprospecting,	
	biomonitoring of soil and air. 3) Detail understanding of principles of toxicology and	
	3) Detail understanding of principles of toxicology and biodiversity and its conservations.	
BT.606	1) To understand fundamentals of computer and internet and	
Bioinformatics	world wide web.	
Diomioi maucs	2) To understand the classification database used in	
	bioinformatics primary and secondary.	
	3) To study principles and applications of evolutionary analysis	
	of biological data.	
	of ofological data.	

BT.607 Practical Course: Plan Biotechnology	 Student are able to understand and perform: isolation and characterization of: Xanthomonas citri, rhizobium species' preparation and efficiency testing of biofertilizer. Prepare of stock solutions, explant sterilization, media 	
	preparation and sterilization, callus culture, shoot tip culture.	
BT.608 Practical Cours Genetics an Bioinformatics	 Student will be able to understand and perform: To understand and verification of Mendel's law using color beads. Shall able to perform DNA isolation, perform transformation and conjugation in bacteria. To understand biological database and database search on web, shall access database preparation of stock solutions, searching for gene and protein sequences. 	
BT.609 Practical Cours Pharmaceutical Biotechnology	 Student will be able to understand and perform: to understand and perform sterility testing of pharmaceutical products, chemical and biological, MIC. To understand and perform MLT, validation of LAF, membrane filtration and sterility testing. 	

Department of Microbiology

B.Sc. Microbiology

Under Graduate (UG)

After successful completion of three year degree program in (**B.Sc. Microbiology**) a student should be able to;

		D 0 10 0 10 000
Sr. No.	Programme Outcomes (POs)	Program Specific Outcomes (PSOs)
1.	Students will understand the concepts and significance in the field of Biochemistry / Biotechnology / Microbiology that can be used for solving the real time problems.	1. Microbiology graduates will apply their knowledge and skills gained through the program to achieve success in their academic and/or professional development.
2.	Students will acquire skills and ability in their field and find professional opportunities in industry, agriculture and higher studies.	2. Our graduates can apply this knowledge for pursuing postgraduate education.
3.	Students will have improved personal qualities and transferable skills to help them to groom as responsible citizens.	 The program shall promote them to choose varied career paths in various disciplines of the subject. Our candidates will develop a sense of societal and ethical responsibility pertaining to health, agriculture, dairy, genetic engineering, and fermentation industry. The knowledge shall promote our graduates to stand independently amidst the growing technological innovations in the subject. Students will have an expertise in isolation techniques and diagnostic tests.

Course Outcomes

Semester-I (F.Y.B.Sc. Microbiology)

After completion of these courses students should be able to;	
Courses	Outcomes
MB 101: Microbial Diversity	1. To understand the basic microbial structure and study the comparative characteristics of prokaryotes and eukaryotes and also Understand the structural similarities and differences among various physiological groups of bacteria/archaea 2. Know general bacteriology and microbial aspects pertinent to bacteria, fungi and algae. 3. How the subject emerge as new branch of biology. 4. To learn ancient view about life continuity and concept of experiment. 5. Aware about historical developments and their applications as technology.
MB 102: Microscopy and Basic Bacteriology	 Demonstrate theory in microscopy and their handling techniques and staining procedures. To know various Culture media and their applications and also understand various physical and chemical means of sterilization. Know general bacteriology and microbial techniques for isolation of pure cultures of bacteria, fungi and algae. Learn aseptic techniques and be able to perform routine culture handling tasks safely and effectively. Comprehend the various methods for identification of unknown microorganisms. To understand the modes of nutrition in microbial metabolism and able to classify the bacteria based on nutrition.
MB 103: Microbiology Practical Paper – I	 To understand the relationship between science and society. To demonstrate theory and practical skills in microscopy and their handling techniques and staining procedures. Understand the basic microbial practices and study the comparative characteristics of prokaryotes and eukaryotes. Comprehend the various methods for identification of microorganisms adopted in Bergey's manual and able to classify the bacteria. To know the various Physical growth requirements of bacteria. Prepare and view specimens using microscopy (bright field microscope).

7. Aware and train in aseptic handling of microbial specimens. Practice safe microbiology, using appropriate protective and emergency procedures. 8. To use appropriate microbiological and molecular lab
equipment and method.

Semester-II (F.Y.B.Sc. Microbiology)

After completion of these courses students should be able to;	
Courses	Outcomes
MB 201: Basic Biochemistry and Cytology	1. Understand the basic microbial structure and function and study the comparative characteristics of prokaryotes and eukaryotes and also Understand the structural architecture and differences among bacteria/archaea. 2. Know basic knowledge pertinent to cell biomolecules.
MB 202: Microbial Techniques	 To know general bacteriology and introduce microbial techniques for isolation of pure cultures of bacteria, fungi, algae and virus. Demonstrate theory and practical skills in handling microbial culture. To know various bacteria based on nutritional needs and also understand various physical and chemical means of sterilization. Discern knowledge about sterility assessment of sterilizing agents.
MB 203: Microbiology Practical -II	 Demonstrate practical skills in microscopy and their handling techniques and staining procedures. Understand the bacterial growth and comprehend various physical and chemical means of sterilization. Know General bacteriology and microbial techniques for isolation of pure cultures of bacteria, fungi and algae. Practice aseptic techniques and able to perform routine culture handling tasks safely and effectively. Understand preparation of standard solutions required in various assays Student can adapt the ability to apply the process of science-demonstrate an ability to formulate hypotheses and design experiments and analyze and interpret results from a variety of microbiological methods and apply these methods to analogous situations.

Semester-III (S.Y.B.Sc. Microbiology)

After completion of these courses students should be able to;	
Courses	Outcomes
MB - 301: Basic Microbial Enzyme	1.To acquaint students with basic concepts of enzymology
and Metabolism	and microbial metabolism
MB - 302: Microscopy and Microbial	1. To complement the students with the basic knowledge
Ecology	about microscopy and microbial ecology.
MB - 303: Practical Paper-III	1. To introduce the students to various structural,
	biochemical, environmental and microscopic aspects of
	microorganisms along with study of extremophiles.
SEC- I: Microbiological Analysis of	1. To highlight the number and range of pathogens that may
Air, Water and Soil	be found in air, water and soil.
	2. To describe some of the key preventative and
	monitoring actions which maintain and improve
	microbiological quality of water, air and soil.
	3. To introduce the concept and use of indicator bacteria
	specially in water quality monitoring.
	4. To describe the principal indicator bacteria used and
	their key characteristics which make them suitable for use
	as indicators.
	5. To emphasize the value of E. coli and thermotolerant
	fecal coliforms as routine indicators

Semester-IV (S.Y. B.Sc. Microbiology)

After completion of these courses students should be able to;	
Courses	Outcomes
MB - 401: Genetics and Immunology	1. To acquaint students with basic concepts of microbial
	Genetics and Immunology.
MB - 402: Basic Industrial	1.To acquaint students with basic concepts of industrial
Microbiology	microbiology.
MB - 403: Practical Paper - IV	1. To enhance practical skills of students in concern with
	Genetics, Industrial microbiology and enzymology.
SEC-II: Biofertilizers and	1. To aware the students to the adverse effects of plant
Biopesticides	production and protection of chemicals on the biotic and
	abiotic components of environment.
	2. To familiarize students with the microbes used as
	biofertilizers for various crop plants and their advantages
	over chemical fertilizers.

Semester-V (T.Y. B.Sc. Microbiology)

After completion of these courses students should be able to;	
Courses	Outcomes
MB 501- Microbial Genetics	1. To introduce the concepts in Microbial Genetics.

	2. To acquaint with molecular techniques.
	3. To update applied knowledge in the field of microbial
	genetics.
MB 502- Bioprocess Technology	1. To introduce with concepts related to bioreactors and
Dioprocess recliniology	their types.
	2. To acquaint with concepts strain improvement and scale
	up.
	3. To understand the processes involved in fermentation.
	4. To study various methods of strain improvement.
MB 503- Metabolism	To study various methods of strain improvement. To acquaint with the principles of Bioenergetics.
VID 505- Wetabonsin	2. To understand the concept of thermodynamics and
	Electron Transport Chain.
	3. To define the types of anabolic and catabolic pathways
	and the mechanisms involved therein.
	4. To understand the process of synthesis of Fatty acid &
	purine and pyrimidine nucleotide.
MB 504 - Basic Immunology	1. To study the concepts related to antigen and antibody.
Tib evi Busic Immunology	2. To study the various immune cells and organs functional
	in a body.
	3. To get knowledge about MHC and Antigen Presentation.
	4. To learn about Immunological Disorders
	m 1 o 10m 1 do c m 21m 10m 10m 2 do c m 21m 10m 10m 10m 10m 10m 10m 10m 10m 10m 1
MB 505- Medical Microbiology-I	1. To introduce the concepts in Medical Microbiology.
<i>5</i> v	2. To enrich knowledge about various diseases with respect
	to diagnosis, prevention, control and role of chemotherapy.
	3. To understand the human anatomy with functions.
	·
MB 506 (A) - Food Microbiology	1. To understand concepts in milk microbiology.
	2. To complement the students with the basic knowledge of
	food microbiology.
	3. To acquaint the students with food preservation
	techniques.
MB 506 (B)- Pharmaceutical Quality	1. To develop practical skills involved in interpretation of
Control & Quality Assurance	biological materials and data.
	2. To promote development of entrepreneurship and build
	up Professionals in Pharmaceutical Analysis, teaching and
	R&D work.
	3. Develop a scientific attitude to make students open
	minded, critical and curious about scope, functioning and
	the future of pharmaceutical Microbiology.
MB 507 - Methods in Medical	1. To acquaint with microbial isolation techniques from
Microbiology – I	various clinical samples.
	2. Gain knowledge about diagnostic tests for diseases.
	3. To train to determine potency of antibiotics using
750 700 No. 11 11 11 11 11 11 11 11 11 11 11 11 11	various standard methods
MB-508: Methods in Industrial	1. To acquaint the learner with various fermentation
Microbiology-I	processes.

	2. To apply the concept of these processes for commercially valuable products.3. To correlate this knowledge with the industrial fermentation process.
MB-509: Methods in Applied Microbiology-I	 To learn the isolation of agriculturally important microorganisms causing food poisoning & microbes responsible for food fermentation. To understand the principle and methods of microbiological examination of milk and sewage. To acquaint the students with the concept of BOD and nanoparticles.

Semester-VI (T.Y.B.Sc. Microbiology)

After completion of these courses students should be able to;	
Courses	Outcomes
MB 601- Molecular Biology	1. To get acquainted with the molecular regulatory
	mechanisms in bacteria.
	2. To understand the principles underlying techniques used
	in molecular Biology.
	3. To study the principle and applications of recombinant
	DNA technology.
MB 602- Fermentations	1. To introduce fermentation processes and their types.
	2. To provide knowledge about the chronological
	development in fermentation.
	3. To acquire knowledge about large scale production of
	commercially valuable products.
MB 603- Enzymology	1. To understand regulation of enzyme action.
	2. To get acquainted with enzyme technology.
	3. To get knowledge about techniques involved in enzyme
	purification.
MB 604: -Advanced Immunology	1. To understand various protective mechanisms underlying
	the human immune system, immunological disorders and
	tumours.
	2. To study the principles underlying various
	immunological techniques.
	3. To debate the immuno-prophylactic measures against
	various novel viral infections.
MB 605-Medical Microbiology - II	1. To create awareness about the infectious diseases.
	2. To create theoretical base for practical approaches.
	3. To study prognosis of bacterial, viral and other diseases.
MB 606 (A) - Agricultural	1. To understand concepts in plant pathology.
Microbiology	2. To acquaint the students with basic knowledge of plant
	disease control.
	3. To complement the students with the concepts in
	Agricultural Microbiology.

MB 606 (B)- Regulatory Practices and IPR	1. To promote development of entrepreneurship and know the importance and scope of the IPR in Microbiology. 2. To get acquainted with regulatory practices undertaken at commercial level. 3. Develop a scientific attitude to make students open minded, critical and curious about scope, functioning and the future of Commercial Microbiology.
MB 607 - Methods Medical	1. To study pure culture techniques involved in the isolation
Microbiology – II	of pathogens from clinical samples.
	2. To investigate the normal flora of skin and mouth.
	3. To handle diagnostic tests involved in detection of STDs.
MB-608: Methods Industrial	
	1. To analyse the potency of an antibiotic by suitable
Microbiology-II	bioassay.
	2. To study the stoichiometric evaluation of enzyme activity.
	3. To handle the techniques involved in enzyme
	immobilization.
MB-609: Methods in Applied	1. To isolate and screen microbes involved in
Microbiology-II	bioremediation processes
	2. To analyse the wastewater / liquid effluent and
	emphasize on safety handling of hazardous materials.
	3. To aware the students about bioenergy, bio fertilizers,
	biocontrol agents etc.

Post Graduate (PG)

After successful completion of two year degree program in ($\underline{\mathbf{M.Sc.\ Microbiology}}$) a student should be able to;

Sr. No.	Programme Outcomes (POs)	Program Specific Outcomes (PSOs)
1	Basic and applied aspects of microbial diversity and systematic.	1.To have the knowledge of Microbiology through theory and practical as well as knowledge of basic concepts of Microbiology in depth.
2	Impact of various groups of microbes on earth atmosphere, human, plant and animal health and technology development.	2.To known about the basic aspects of Genetic makeup of bacteria ,algae, fungi and virus.
3	Applications of microbial biomolecules in various fields	3. To understand concept and significance of enzymes in non-aqueous environment.

4	Biotechnological significance of enzymes from	4.To study trends in pharmaceutical
	extremophiles, environment, medicine and	microbiology.
	industry.	

Semester-I (M.Sc. Microbiology)

After completion of these courses students should be able to;		
Courses	Outcomes	
MB-101 Microbial Taxanomy and	1. To introduce the student with Bergey's Manual.	
Diversity	2. To make students aware of the viral Genetics.	
	3. To study the culturable and non culturable biodiversity.	
	4. To study Extremophile bacteria.	
	5. To understand the process of Algal farming for	
	biodiesel.	
MB-102 Microbial Biochemistry	1. To introduce the students with microbial metabolism.	
	2. To study concept of Anabolism and Catabolism.	
	3. To understand the process of transport and energy	
	metabolism.	
	4. To study the Microbial ATP synthase complex	
	5. To understand the process of synthesis of Fatty acid &	
	purine and pyrimidine nucleotide.	
	6. To study of the metabolism of carbohydrates.	
MB -103 Bioanalytical Techniques	1. To introduce the students with bioanalytical techniques.	
	2. To study of the Radiolabeling techniques.	
	3. To understand the biophysical methods of analysis of	
	biomolecules.	
	4. To study the Microscopic techniques.	
	5. To understand the process of Biosensors, Nano-	
	biosensor.	
Practical Course	To develop the knowledge of Extremophiles.	
MB- 104 Methods in Microbiolgy		
Practical Course	To develop the knowledge of basic biomolecules.	
MB- 105 Methods in Biochemistry		

Semester-II (M.Sc. Microbiology)

After completion of these courses students should be able to;	
Courses	Outcomes
MB- 201 Microbial Genetics	1. To introduce the students with Genome organization.
	2. To study the molecular techniques.
	3. To study the plasmid biology.
	4. To study the gene regulation in eukaryotes and
	prokaryotes.
	5. To give exposure of Virus genome replication.
MB- 202 Advanced Enzymology	1. To introduce the students with Bioenergetics.
	2. To study the role of enzyme.

MB-203 Immunology	 To study enzyme regulation. To introduce the student with enzyme technology. To study the techniques of enzyme engineering. To study role of Antigen and Antibody . To study the Immunological Techniques. To study Transplantation process. To study technique of Immunoflurescence.
	6. To develop the knowledge of Immune response.
Practical Course MB 204: Methods in Enzymology	To know importance and scope of enzymes.
Practical Course MB-205 Methods in Molecular Biology and Immunology	To develop the knowledge of techniques in immunology and molecular biology.

Semester-III (M.Sc. Microbiology)

After completion of these courses students should be able to;	
Courses	Outcomes
MB-301 Applied and Environmental	1. To introduce the students with Environmental
Microbiology	microbiology.
	2. To study microbial communities and ecological
	adaptation.
	3. To know about conservation of microbial waste
	management.
	4. To study biological conversion of Lignocellulosic
	waste.
	5. To study food microbiology and food intoxication.
MB-302 Molecular Biology and	1. To introduce the students with current status and future
Bioinformatics	of bioinformatics.
	2. To acquaint with advance knowledge of different
	instruments related to basic bioinformatics.
	3. To study of DNA topological properties.
	4. To study of Protein targeting and degradation.
	5. To develop the knowledge of Bioinformatics tools.
MD 202 DI 41 I	1.T. 1
MB -303 Pharmaceutical	1. To know scope & importance of Pharmaceutical
Microbiology	Microbiology.
	2. To study Quality control and Quality Assurance.
	3. To study large scale production of antibiotics, enzyme,
	vitamin, organic acid, amino acid.
	4. To known about Regulatory aspects and quality assurance in pharmaceuticals.
	5. To study of Drug design.
	5. 10 study of Drug design.

Practical Course MB- 304 Methods in Biostatistics and Bioinformatics	To make students enable for Exploring Biostatistics and Bioinformatics.
Practical Course	To develop the knowledge of evaluation techniques in
MB- 305 Methods in Applied	Applied Microbiology.
Microbiology	

Semester-IV (M.Sc. Microbiology)

After completion of these courses students should be able to;		
Courses	Outcomes	
MB- 401 Fermentation Technology	 To introduce the students with Upstream processing in fermentation technology. To study the Design and Application of Bioreactor. To study the Microbial Products enzymes, organic acids, amino acids, polysaccharides, antibiotics. To study the Strain improvement process. To give exposure of IPR. 	
MB- 402 Applied Molecular Biology	 To introduce the students with Tools of molecular biology. To study the Microbial Genomics. To study Protein Engineering and Proteomics. To introduce the student with techniques in molecular biology. To study the application of genetic engineering. 	
MB-403 Agricultural Microbiology	 To study Microbial communities and ecological adaptations. To know about Microbial Bio control. To study microbial interaction with plant roots. To introduce the students with current approaches in agricultural microbiology. 	
Practical Course MB 404: Methods in Biotechnology	To develop the knowledge of techniques in biotechnology.	
Practical Course MB-405 Project Dissertation	To improve research oriented skills of students.	

Department of Commerce

F.Y.BCOM SEM-I & II

Subject Name	Objectives	Outcomes
ENGLISH FOR BUSINESS	 To introduce communication theory to students. To inculcate various communication skills in English among students. To introduce various soft skills to students. 	 To improve oral and written competency in English of students. To develop linguistic competency of students through various grammatical and vocabulary exercises.
MARATHI	 To introduce various famous entrepreneurs to commerce students. To develop Marathi reading and linguistic comprehension of students. To improve professional and entrepreneurial attitude of students through success stories. 	To Acquaint Students with special challenges of starting new ventures To know the qualities to become a successful entrepreneur.
MICRO ECONOMICS	 Micro economics theory is to analyse how individual decision-makers, both consumers and producers, behave in a variety of economic environments. The common goal in all of these issues is to identify the incentives of the various participating agents and the trade-offs that they face. 	 Micro economics theory is to analyse how individual decision-makers, both consumers and producers, behave in a variety of economic environments. The common goal in all of these issues is to identify the incentives of the various participating agents and the trade-offs that they face.
FINANCIAL ACCOUNTING& COSTING	 To lay a foundation for understanding the Accounting Standards issued by the ICAI. To gain the ability to solve problems relating to settlement of obligations on dissolution of partnership firm and also 	Cost Accounting, elements of costs and the concept of cost sheet.

	relating to their business combinations	To produce to the horse of
COMPUTING SKILLS	 To familiarize the Students with basics of Internet. To understand the use of Office application 	 To understand the how of accounting software works. To know the relevance of Tally accounting package in modern competitive world.
MODERN OFFICE MANAGEMENT	 To understand the concept of office management. To acquire operational skills of office management. To develop the interest in methods and procedures of office management. To know the secretarial procedure 	 To understand office layout and environment in modern context. To acquire the basic knowledge of office appliances and machines. To understand office system. To acquire knowledge of office meetings and proceedings.
PRINCIPLES & PRACTICES OF BANKING	To impart practical knowledge & applicability of theoretical concepts with routine examples	To impart practical knowledge & applicability of theoretical concepts with routine examples
QUANTITATIVE TECHNIQUES	• objective- measurements and the statistical, mathematical, or numerical analysis of data collected through polls, questionnaires, and surveys, or by manipulating pre-existing statistical data using computational techniques.	objective- measurements and the statistical, mathematical, or numerical analysis of data collected through polls, questionnaires, and surveys, or by manipulating pre-existing statistical data using computational techniques.

S.Y. BCOM SEM-III & IV

Subject Name	Objectives	Outcomes
Subject Name BUSINESS SKILL	To equip students with the necessary soft skills to enhance their competitive edge in the job market 2. To imbibe in students positive attitude towards life and work.	 Student shall be able to – Understand the significance and essence of a wide range of soft skills. Learn how to apply soft skills in a
	• To help students excel in their	ı c
	individual and professional lives	improve interpersonal
	using the soft skills	relationships.

	•	Learn how to employ soft skills to enhance employability and ensure workplace and career success
MACRO ECONOMICS	The objective of macroeconomic policies is to maximize the level of national income, providing economic growth to raise the utility and standard of living of participants in the economy.	The outcome of macroeconomic policies is to maximize the level of national income, providing economic growth to raise the utility and standard of living of participants in the economy.
BUSINESS AND TAX LAWS	 Learn The Law & Legal Principals of Contract Act 1872. Draft legal documents including partnership deed & service tax returns. Understand the basic structure, rules & powers of consumer protection act. To know the provision regarding strikes and lock outs under industrial dispute act. 	of patents and environment protection act. Students to gain a better underrating of the negotiable instrument act. Learn how to analysis the legal constraints on business.
CORPORATE ACCOUNTING	 To acquaint the students with modern updated computerized accounting system and software. To develop an understanding of the rules of measurement and reporting relating to various components of corporate financial transactions. 	accounting principles and procedures for recording of transactions related to corporate entities.
COMPUTING MANAGEMENT	 To Understand the Objectives of Computerized Accounting. To Know the Principles Of Tally Software. To acquire Computing Skills. To Study various features of Tally. To Acquaint with Modern Technology In Accounting. To study of Goods and Services Tax Act. 	Demonstrate a basic understanding of computer hardware and software. Demonstrate problem-solving skills. Apply logical skills to programming in a variety of languages. Utilize web technologies.

	To use Tally with GST.	 Demonstrate basic understanding of network principles. Working effectively in teams. Apply the skills that are the focus of this program to business scenarios.
BUSINESS ENTREPRENEURS HIP	 To improve the knowledge, skills & competencies of the potential & existing entrepreneurs in various sector. To improve life management skills of children and youth. To provide intellectual resources to youth for their best future. To improve social and economic skills. To provide diverse opportunities for participation. To empower to people to create business opportunities. To boost the Entrepreneurship Development Programme. To boost women and rural entrepreneurship. 	 To understand different methods to assess the attractiveness of business opportunities. To understand what characterizes an attractive business opportunity and common pitfalls during the entrepreneurial process. To products or services to market. To understand different methods that can be used to minimize uncertainties at different stages of the entrepreneurial process. To understand the dynamics of how teams develop and function as well as the various types of conflicts that can arise during teamwork
MODERN BANKING & FINANCIAL SYSTEM	 To acquaint students with the new concepts of Banking. To update the students about new changes in Banking. To know the relevance Banking practices in modern competitive world. To make understandable of Banking operations. 	 Explain the various functions of money, and how money has evolved over time. Show that modern banking systems include both privately owned commercial banks and government-owned central banks. Explain how commercial banks create money through the process of taking deposits and making loans. List what is included in the various measures of the money supply.
	 To acknowledge the students with the cost accounting concepts, Methods and techniques. To enable the students to apply analytical tools & techniques of cost accounting. 	 Demonstrate a basic understanding of computer hardware and software. Demonstrate problem-solving skills.

COST ACCOUNTING	• To lay a foundation for understanding the Labour&	•	Apply logical skills to programming in a variety of
	Overheads Accounting		languages.
	procedure.	•	Utilize web technologies.
	• To develop competence among	•	Present conclusions effectively,
	the students.		orally, and in writing.
		•	Demonstrate basic understanding
			of network principles.
		•	Working effectively in teams.
		•	Apply the skills that are the focus
			of this program to business
			scenarios.

T.Y.BCOM SEM-V & VI

Subjet Name	Objectives	Outcomes
INDIAN ECONOMIC SCENARIO	 To acquaint students with new concepts of Economics. To update the students about new changes brought in Indian Economy. 	 To know the relevance Economic practices in modern competitive world. To make students competent to become success in competitive examination.
PRINCIPLES OF AUDITING	 To acquaint students with new concepts of Auditing. To update the students about new changes brought in practices of Auditing . 	 To know the relevance Economic practices in modern competitive world. To make students competent to become success in competitive examination.
INCOME TAX	 To know the various provisions relating to Income and Incomes tax computation. understand the basic concepts of the Income Tax Act 1961 and get the elementary knowledge of scheme of taxation in India. 	To compute Income and Tax of an Individual assesse under the Act.
HUMAN RESOURCE MANAGEMENT	To familiarize students with concepts of human resource planning, Job Analysis, Recruitment and selection procedures.	• To introduce the concept, principles and practices of H.R.M. to the students.
BUSINESS MANAGEMENT	To familiarize students with concepts of modern management techniques.	To introduce the concept, modern management techniques.

ADVANCED ACCOUNTING- I	Developing Skills for Applying Knowledge to Business Situations.	1 0 11 0
ADVANCED ACCOUNTING -II	Developing Skills for Applying Knowledge to Business Situations.	1 0 11 0
GOOD & SERVICE TAX GST	 To equip students with the necessary soft skills to enhance their competitive edge in the job market. To imbibe in students positive attitude towards life and work. 	individual and professional lives

To achieve wo	enhance free trade at global level d attempt to bring all the countries gether for the purpose of trading. increase globalization by egrating the economies of ferent countries. To achieve orld peace by building trade ations among different nations.

MCOM SEM-III & IV

Subject Name	Objectives	Outcomes
MANAGEMENT ACCOUNTING I	 Understand the nature, mechanics and tools of management accounting and their managerial implications. Understand the philosophy and rationale of the financial analysis. Understand the techniques of analysis and interpretation of financial statements. 	 Develop an appreciation about the utility of techniques of financial analysis for management information and decision making process. Evaluate the implications of cash flow and fund flow on financial position of an industrial organisation.
ENTREPRENEURS HIP & PROJECT MANAGEMENT	 Encourage and inspire the students to become an Entrepreneur. Acquaint the students with the challenges to start a new venture. 	Provide theoretical foundation for executing various projects. highlight the support system for Entrepreneurship Development
ORGANIZATIONA L BEHAVIOUR	 Get an overview of organizational behaviour and the challenges and opportunities. Understand the concept of behaviour – individual and organizational Behaviour. Know about perception, learning, attitude, values and emotions. 	 Gain knowledge of Motivation and Leadership and its various theories . Acquire basic knowledge of organisational change and development.
MANAGEMENT ACCOUNTING- II	 Understand the concept and techniques of financial control used in management accounting Imbibe knowledge about the control techniques namely budgetary control and standard costing. Develop the skill to analyse the cost-variance for effective cost control. Familiarise with the concept, role, and utility of marginal costing, and its implications and utility for managerial decision making process. 	 Acquaint themselves with the concept and significance of working capital and its implications in managing the funds. Familiarise with the concept, role, and utility of marginal costing, and its implications in decision making. Provide necessary inputs in form of concepts, theories and appraisal techniques related to capital expenditure decisions, and develop an integrated approach to capital-expenditure decision-making process

MODERN RETAIL MANAGEMENT	 Acquaint the students with the various concepts and theoretical aspect of retail management. Introduce the most modern techniques and practices of retailing for employment opportunity. Understand dynamics of modern organised retail trade. 	 Get the insight of the theoretical aspect of retail management. Know the modern techniques and practices of retailing in India. Design the strategies and understand dynamics of modern organised retail trade.
INFORMATION SYSTEM FOR BUSINESS	 Develop conceptual understanding about latest developments in the field of Information Technology and the impact of I.T. in Managing a Business. Learn to use Information Technology to gain competitive advantage in business. Develop students as Cyber Security experts, Information System Auditors. 	 Analyze and model the flow of information through business processes. Formulate plans and architectures for the capture, storage and retrieval of data. Develop computer programs to support or automate business processes. Apply networking concepts and technologies to support business needs. Align information systems and services with business strategy and formulate plans for the retrieval and analysis of supporting data. Document, monitor and assess the effectiveness of IT controls.
ADVANCED ACCOUNTANCY OR	 After studying this paper the student will be able to – Understand the advanced aspects of accounting relating to company liquidation, Holding company, and Hire-purchase. Understand the method of presenting financial statements by Insurance companies 	Understand the accounting procedure for goods of small value under hire- purchases transactions.
HUMAN RESOURCE MANAGEMENT	 To endow the student with a broad perspective on themes and issues of Human Resource Management. To apply theories of social science disciplines to work place issues. 	 To understand the importance of training and morale. To know the role of Ethics in HRM

Department of B.B.A
